Minutes of M.D. Council of Lambton

The first meeting of new council was held in secretary's office, Craigmyle, on March 31th, at 2 p.m. The Returning Officer and all councillors were present. New councillors signed oath of office.

At 2.10 p.m. the Returning Officer called the meeting to order, and asked for nominations for Reeve for the ensuing year.

It was moved by coun. Chapman that coun. Nelson be Reeve. Coun. McDonald moved that nominations close. This was carried, and coun. Nelson was unanimously chosen as Reeve.

On the motion of coun. Martin, coun. Simpson was unanimously elected deputy reeve for the first six months of the year.

Minutes of last regular and special meetings were read, and on motion of coun. Chapman were adopted.

Secretary read accounts which had been assigned to the Municipal District by Dr. Hicks. These were considered satisfactory.

Secretary was instructed to write Edmonton for further particulars regarding Health Units.

Moved by coun. McDonald that the following accounts outstanding in connection with the Government road work relief done last fall, be passed for payment:—E. L. Long, $5.00 for balance of rent of cook car; E. Nelson, $11.00 for 10 miles mileage and cash in taking men to and from work, and to meals when installing culverts; F. C. Hazlewood, $35.00 for use of camp ground and pumping water; and High land Livery and Feed Barn, $19.00 for water. Carried.

Moved by coun. Martin, seconded by the Reeve, that secretary's salary be reduced to $1,500 per annum. Carried unanimously.

Moved by coun Chapman that we offer to re engage W. H. A. Thompson & Co. as auditors for 1931, at a fee of $125.00. Carried.

Moved by coun. McDonald that the Reeve receive $4.00, and councillors $3.00 for $5.00 and 10c a mile mileage for each council meeting attended, and that the councillors be paid $3.00 a day and 10c a mile mileage for road supervision.

Amendment was moved by coun. Chapman that the Reeve be paid $5.00, and each councillor $4 and 10c a mile mileage for each council meeting attended, and that the question of payment for road supervision be deferred until next meeting.

Upon being put to a vote amendment was carried unanimously, with councillors McDonald and Farwell voting against.

The matter of engaging a weed inspector for next came up for discussion. A letter was read from Craigmyle U.F.A., endorsing J. B. Boon as weed inspector.

It was moved by coun. McDonald that we do not employ J. B. Boon as weed inspector this year; that we endeavour to get some man for the whole district on the municipality to commence work upon such date as the Council may agree upon, and that he be employed on a monthly basis.

Amendment was moved by coun. Nelson, seconded by Deputy-Reeve, that we weed inspector at a salary of $1000.00 for a period of seven months, commencing the 15th day of May.

Amendment was put to a vote and was declared lost (being a tie), coun. Nelson, Simpson and Chapman voting in favor, and coun. Martin, Farwell and McDonald against.

The motion was then put to a vote and carried by same vote as before.

It was moved by coun. Farwell that the matter of appointment of weed inspector be left in abeyance until next meeting, and that the secretary write Mr. E. L. Gray at Edmonton asking him to recommend a man, and enquiring what salary would be required. Carried.

The question of getting Travelling Clinic was discussed. It was moved by the Reeve that the secretary write to the local districts in the municipality and get a list of those who would take advantage of the Clinic, if it can be brought to Delia this year. Carried.

Moved by coun. Simpson that the Reeve and sec.-treas. be authorized to transact the ordinary banking business of the municipality, and sign cheques on behalf of the district.

Moved by coun Chapman that the Reeve and secretary be authorized to borrow $7,000.00 for relief purposes, and $5,000.00 for hospitals from Canadian Bank of Commerce at Delia at 6½ per cent. Carried.

Moved by coun. Chapman that we forward to the Hail Insurance Board a list of claims for hail, and ask to file to the effect that the paying of commissions to municipal secretaries is killing the Municipal Hail Insurance and causing much dissatisfaction, and all commissions be taken off applicants' premiums, thereby lowering the cost of insurance, and making it possible for farmers to remit sooner to Municipal Hail Insurance. Carried.

Moved by coun. Chapman that the Reeve be appointed delegate to the Municipal Hall Convention. Carried.

Moved that agreement which Mr. Trego had signed in settlement with the Municipality re selling harness owing by the Alsask Chemical Company.

BOY SCOUT NEWS

The Boy Scouts and Cubs held their first father and son banquet in the United Church on Tuesday evg., March 24th, when seventy-four boys and "Dads," and honored guests did justice to the good things served by the "Mess." who constituted the background of the scene. The occasion was the first visit of the new Scout Commissioner for the Province, W. S. Buchman, of Edmonton, who gave a short talk on Scouting. He aims and objects, stressing particularly the mistaken idea of some that it is connected in any militaristic way with the army, emphasizing the fact that the League of Nations is encouraging the movement, and now regards it as one of the greatest influences towards world peace among the youth of the nations. He illustrated his point with motion pictures of the 1929 Scout Jamboree, where 42 countries were represented by over 50,000 Scouts.

Mr. Norman Burke was toast master. The toasts were given by the boys, and replied to by the "Dads" and guests. Six little lads, George and Buddy Farquharson, Bobbie Sinclair, Andrew Dayfruk, Jimmy Fuller and Lorne Snyder, gave a very illustration of Cub usefulness in the "Broom and Brush Brigade," when they demonstrated how they would help to clean up Canada some day. Another Cub, Everett Moore, recited "Be on Time."

Mr. Retz, president of the local organization, read greetings from the previous president, Dr. W. A. MacDonald, of Berthierville, Alta.

Scout Master Roy Anderson gave a short resume of the work being attempted locally by the Scouts, making a plea for stronger support and more assistance from parents. He also spoke of the instruction for proficiency badges, such as first aid, carpentry, mechanics, etc.

Mr. A. S. Sweetman lead the singing, with Mrs. Geo. Kennedy at the piano.

Moved by coun. McDonald that the agreement with Mr. Trego be accepted by the council. Carried.

Letter was read from Drumheller Municipal Hospital District, offering 35% discount arrears of taxes owing prior to 1930, for a cash payment of these arrears.

Moved by the Reeve that we ask Drumheller Hospital District if the offer would still hold good if paid half cash now and the balance in the fall. Carried.

Letter was read from District Engineer asking for particulars of wages and hours worked on relief work on road work. It was decided to defer setting these wages until next meeting.

Secretary read some applications he had received for grain relief. Mr. Haigh was present from the Canadian Legion at Delia to find out what action the council intended to take with the Soldier Settlement Board farmers this year in connection with seed grain relief.

Secretary advised that he had written to Edmonton for particulars regarding seed grain relief this year, but that only reply he had got so far was that legislation was being prepared, and that as soon as that was passed we would be advised.

While nothing definite could be promised until particulars were received from Edmonton, the council felt certain that the Soldier Settlement Board farmers would receive the same treatment as any other.

Moved by coun. McDonald that we ask the Relief Committee to continue for the good work they are doing, and ask them to carry on for another year. Carried.

Monthly financial statement was read.

A circular from Edmonton regarding the Municipal Medical Scheme, was read and referred to Reeve.

Secretary read letter from Drumheller Hospital in connection with the account of John Steven, an indigent. It was moved by coun. McDonald that part of this account, provided the Village of Craigmyle agree to pay the balance. Carried.

Correspondence was read from Major-General Sir W. L. Gwatkin, C.B., Deputy Asst. Adjutant General, Military Headquarters, No. 2 District, Calgary, re Poppy Day Fund Share, W. L. Thompson.

Moved by coun. McDonald that account be presented be paid. Carried.

Meeting adjourned.

ACCOUNTS PASSED FOR PAYMENT

Hoyle's Painters, 25c; Tabbitt Bros., $18.10; Phone, $6.30 and $11.60; West Municipal Store, $16.96, $12.15, $8.15; $23.00, $27.60; Delia Times, $5.00; Provincial Training School, $30.00; Farmers' Garage, $46.75; M. Isn't it a Fact?

That the greatest force for the good of the public is the newspapers.

They are the leaders in making better business for the home town.

If some merchants would take the trouble to find out the amount of money sent to mail-order houses from the home town, it would give them an awful jolt.

It would wake them up to the fact that in order to compete with the mail-order houses they should use the same methods as used by the mail-order houses—

ADVERTISING!--The Magnet that Attracts

Mail-order houses appreciate the importance of advertising. That is why they get so much business.

Heavy appropriations for advertising are necessary in their business. They make those appropriations and that is why they get rich at the expense of the local merchants

If local merchants paid as much attention to local advertising as they should, the mail-order houses wouldn't do much business.

Anglicans Plan Youth Conferences Easter Week

Teen-Age Boys and Girls of Edmonton Diocese to Gather in Edmonton

Under the auspices of the Girls' Council of the Women's Auxiliary, a Girls' Conference is arranged to be held in Edmonton on April 10th to 12th. At the same time a committee of the Diocesan Board of Religious Education is arranging a conference of "teen-age boys. The two conferences, while quite separate affairs, plan several things in common.

The Girls' Conference opens Friday, 10th, with a number of discussion groups. The general theme of the Conference is "The Highway to Broader Horizons," the Conference being of a vocational nature.

The girl leaders are planning to form groups, according to the inclinations of those attending and to discuss, accordingly, the opportunities for girls in arts and crafts, business, the professions, and Christian service. Young women outstanding in these vocations will be present, and will discuss with the girls their opportunities.

The Boys' Conference has as its theme, "Youth and the Church." Leaders will address the conference upon such subjects as "The Junior Brotherhood of St. Andrew," "Why I Go to Church," What?" "The place of the boy in the Church." Using the address as a base, the boys will discuss these subjects in groups. They will then reassemble and present the group findings, which will be discussed by the whole conference. Incidentally, this is exactly the plan followed by the bishops at Lambeth Conference.

The Boys' Conference plan nothing on Friday afternoon beyond registration. Friday evening there is to be a joint session, at which the Bishop of Edmonton is to be the guest of honour. As this will in all probability be the last gathering of all boys and girls the Bishop of Edmonton, those responsible for the promotion are making every endeavour to secure as large a gathering as possible.

Saturday morning is given over to sight-seeing, particularly for the out-of-town visitors.

Saturday afternoon will be spent by the boys in their conference discussions. The girls plan to attend a session of the Edmonton Women's Musical Club, and to continue discussions in groups in the late afternoon and early evening. Saturday evening the boys will have demonstrations of various plans of Young People's activities.

Sunday morning a corporate communion is planned—in the case of boys, at the close of an 11.00 a.m. service, the girls will attend the church of their hostesses.

Sunday afternoon at 4 p.m. a Vesper service in the Cathedral will close both conferences officially, a fellowship tea following as a last step.

Economic Conference to Meet in August

OTTAWA, March 28.—The Imperial Economic Conference will be held in Ottawa this summer and the probable date is August 11th. Definite fixing of the date is a matter of meeting the convenience of the Governments of the several Dominions, and the British Empire, and said that Ottawa is doing its share in this direction are now under way.

OBITUARY

LOUIS SVERDAHL

It is with regret that we have to report the death of this highly respected gentlemen, Louis Sverdahl, which took places at his home on Tuesday, March 24th, 1931, at the age of 45 years, 4 months, and 11 days, after a lingering illness.

Deceased was born at Astoria, South Dakota, and had been a farmer in this district for the past 22 years. He is survived by his widow and one son, two brothers and two sisters, to mourn his loss.

Funeral services were held in the home on Friday, March 27th, at 12 o'clock, the Rev. K. F. Wentzel, Craigmyle, officiating. Services were also held in Delia United Church, and were largely attended by residents of the town and district to pay their last respects to the memory of deceased. The soloist was Mr. A. S. Newcombe, with Mrs. J. J. Bradford presiding at the piano.

Interment afterwards took place in Delia Cemetery.

The pall-bearers were— Messrs. W. H. Thompson, John Lalonde, Fred. Heidt, C. Phillips, J. MacAravey, and Arthur Stensland.

Floral tributes were sent by the following:—The Family, Mr. and Mrs. Arthur Stensland, The Larsons, Sverdahl Family, Mr. and Mrs. Wm. Morrison, The Sibbalds and Harry, Mr. and Mrs. C. Phillips, Mr. and Mrs. Geo Cassmidge, Mr. and Mrs. Christianson, Mr. and Mrs. Adam Beaton, John Lalonde, Mr. and Mrs. Fred., Mrs. and Mrs. Lillian; Mr. and Mrs. W. B. Dunlop, Majestic - Farrell Lake W.I., Mr. and Mrs. Ayling.

Winter Bros., of Drumheller, had charge of the funeral arrangements.

Lord Willingdon Is Booster for Canada

OTTAWA, March 27 —"I have just completed four and a half years in Canada, and I would say to anyone who is feeling a fit of the blues to take a trip there," said Lord Willingdon recently in speaking at a gathering in London Each report which comes from England tells the same tale that Lord Willingdon is boosting Canada He says that Canadians are a young and energetic people, industrious and self-reliant, and that Canada, despite a population of only ten millions, is now the fifth trading nation of the world.

Lord Willingdon, on more than one occasion since returning to England, has told of the charm of Canadian women and girls, and said that four charming young Canadian girls had married his four aides de camp.

Drop in Revenue Near Eighty Millions

The problem of making shrinking revenues meet emergencies in a period of general depression is exemplified in the February financial statement of the Government. Covering eleven months of the fiscal year it indicates a drop of $78,353,366 in ordinary revenue, and an increase of $21,095,076 in ordinary expenditure. Increased expenditure is largely accounted for by relief measures and by increased pension payments.

During the eleven months ended February 28 last, ordinary revenue amounted to $322,729,407, as compared with $402,082,773 for the corresponding period ended February 28, 1930. Ordinary expenditure totalled $231,243,180, as compared with $210,148,104 for the eleven months ended February 28, 1930.

The total net debt of Canada on February 28th last was $2,207,695,864. On February 28, 1930, the net debt was $2,156,276,098.

The decline in ordinary revenue as shown by the statement is due to a decrease in receipts from customs duties, excise duties and excise tax (nice, stamps, etc).

On the expenditures side of the financial sheet there appears public debt declined to $106,163,925, from the previous figure at this time last year of $108,762,164. Pension payments totalled $37,364,942., an increase of nearly four million dollars.

Canned Foods Are Displacing Fresh Goods

The steadily increasing use of canned foods is ascribed to greater public confidence in the wholesomeness of what is sold under the pure food laws. Adulteration, misbranding, and poor preparation of canned goods were common practices prior to the pure food act. Now despite the growing competition of fresh fruits and vegetables the consumption of canned foods is increasing.

Canned foods today are produced according to methods which 24 years of laboratory research and field experience have proved to be safest and most wholesome possible. No system, however, is infallible, and the final inspection must be made by the consumer when the cans are opened. Hasty packing, formation and discolouration of the liquid, or swelling of the container, are all danger signals.

Authorities are constantly on the alert to prevent dishonest and ignorant manufacturers who have entered the field, from cheating consumers and discrediting the fine reputation which the canning industry has earned.

Card of Thanks

[Under this heading are charged 25c per line, six words to the line, prepaid.]

Mr. and Mrs F. E. Caswell wish to thank their friends and neighbors for the many kindnesses shown during Mrs. Caswell's recent illness

World's Grain Exhibition

Purity of variety will be an important factor at the World's Grain Exhibition and Conference, to be held at Regina in 1932, where growing tests will be conducted to determine the purity on all cereal exhibits shown.

Varieties, domicile, cereal-list, and chairman of the awards committee of the 1932 international grain exhibition, told producers of Ontario a few days ago that if they hope to capture the top prizes in the competitive classes they should see the purest seed obtainable on a specially prepared piece of land The crop should be allowed to fully mature, be combined, should be cut and stacked, the best sample being covered from the weather, and the best and ripest grains should be knocked out with a flail and saved for the sample to be shown at the exhibition. "Sieve out the grain carefully to get the most uniform seeds, and finally hand-pick the samples for the exhibition of this kind where competition will be so keen, and the prizes so well worth working for," he said.

Report of Cream Prices

For the week ending March 21, 1931, the following prices were reported paid by creameries per pound of butterfat by the several grades of cream, and at the points shown:—

	Special Cream	Extra Cream	Nom. No. Two	Off Grade
	c.	c.	c.	c.
Swifts, Edm.-a	38	36	32	
Swifts, Cal.	39	36	33	15
Cloverbar	39	36	..	..
Jasper Dairy Ltd.				
Edmonton	39	38	..	..
Calgary	39	36	33	..
All others	37	35	32	17

Formaldehyde

It is going out rapidly the last few days. People appreciate getting it in sealed tins. No evaporation of strength. Per pound.....20c

Copper Carbonate

We have two or three hundred pounds of this, that we are selling at a very low price, as we are not handling it after this year.

Brown label Salada 70 cts a lb
'Fresh from the gardens'

Why France Is Economically Strong

Trying to ferret out the reason why France, of all the major nations, has no unemployment, but rather is importing 2,000,000 aliens to work in her fields, mines and factories, Freeman Tilden writes in the World's Work on "Why France is the Top-Dog."

All the chimneys of French factories are smoking. Portuguese workers have been imported in droves to supply the shortage of labor. Italians armed with picks and shovels follow Napoleon's trail over the Alps, in reverse order. Three hundred thousand Poles were given jobs last year. There are no dolees, no Communists, no bread lines.

The findings run something as follows: Frenchmen are born marketers. They waste nothing. They know how to stretch French paper to make the two ends meet. Nothing is wasted.

Nor does this mean they have poor food. They furnish the chefs of the world. They do not dress shabbily. They dress the world. But they dress themselves first.

They buy for cash. They pay down in full for real estate. Not many know what call money is. Margins are on printed pages only. High-powered salesmen are an American institution. French cars seldom wear out carrying heavy mortgages around. Every large business concern has its economat. Employees get good meals at cost. The economat purchases at wholesale prices. Railway employees even get their coal and household supplies for a third what others pay outside of the economat. Companies do not exploit or communicate their help.

The Frenchman hardly knows what a robot is. Almost everything is hand made. A country that is many times smaller than any one of our Western Provinces supports its millions by manufacturing its individual artists well. Thus the under-dog has become top-dog.

Is there not in the French situation as thus disclosed a suggestion of value worthy of the thoughtful consideration of the producers and workers of other countries?

Here in America, in Canada as well as in the United States, every encouragement, indeed the most striking inducements, are held out to people of all walks of life to help on the industrial machine. Not more than one fifth use of credit has become almost universal, not only for capital expenditures which is justifiable and proper if the borrowings are kept within reason, and the capital expenditures be which they are devoted are of a revenue-producing character, but for current expenses. People are urged to buy not only necessities but luxuries on the credit plan, with payments spread over a term of months, or even years. The argument advanced is frequently to enjoy these luxuries now and while you are paying for them, rather than to wait until you have saved sufficiently to pay for them outright. It is a fallacious argument, a fatal mistake to make.

Complicated as the fairly general use of the banks will not extend credit at the present time. Possibly, however, the mistake by the banks in the past is that they extended too much credit too easily, coupled with the further mistake that they demanded too high a rate of interest on loans which made it impossible for the borrower to ever get out of debt once he is landed in that position. Manyan man, both city residents and farmers, have told the writer about having got into debt to the banks or mortgage companies they find a long uphill struggle to get out. They found themselves working for those financial corporations to meet interest charges rather than for themselves. They vowed that once they got out of debt, they would never get in again, but rather would do without all things until they could pay for them outright, tighten their belt if necessary, and carry on in the meantime.

It is the man who is carrying a load of debt, paying heavy interest charges, possibly on non-productive assets or expenditures made in the past, who finds himself in real difficulty in times of business depression. Any little cash he can get must be paid out again to keep himself solvent. Instead of being available to carry him along until the tide turns again. But the man who has followed the policy of "pay as you go," who is free of debt, is the man who can most easily weather the storm. Such a man can "carry on," but the man already heavily in debt finds himself in the predicament of going in still deeper, and the final crash is inevitable. Sooner or later he finds himself in an impossible position, so deep in fact that he can never get out.

In the French way not the better way? Does it not make for greater contentment, a more consistent measure of good times, a more enjoyable, happier existence?

Alberta Fur Farming

Three Hundred and Forty Individuals and Companies Operating Fur Farms in the Province

According to the annual report of Benjamin Lucas, Alberta game commissioner, some 340 persons or companies were operating fur farms within the province in 1930. On these farms were the following animals: Muskrats, 45,510; silver foxes, 13,527; mink, 1,660; cross foxes, 786; red cross foxes, 276; blue foxes, 466; rabbits, 409; badgers, 852; beavers, 112; caracul sheep, 169; and smaller numbers of otter, marten, raccoon, skunk, fitch, coyote and lynx.

Junior Agricultural College

Proposal For Establishment Of College At Head Of the Lakes

The establishment of a Junior Agricultural College at the Head of the Lakes for the training of young men and women of Northwestern Ontario was advocated before the Port William Chamber of Commerce at a recent meeting. Members of the Port Arthur Chamber of Commerce attended the meeting and supported the proposal.

Cotton gets its name from an Arabic word qutn.

Big Business In Farm Machinery

Nearly 100,000 Tractors Sold In Western Canada In Past Twelve Years

Nearly 100,000 tractors have been sold in Western Canada in the past twelve years, and of this total, more than half went to farmers in Saskatchewan, according to the latest statistics. In three years more than 5,000 threshers have been sold in Saskatchewan, half the total for all Western Canada. In the past five years, Saskatchewan farmers have purchased 6,000 combines and the total for the whole of that period was 9,000. Out of the 2,046 threshers sold in the west in 1930, 626 were bought in Saskatchewan.

Scotland Boosting Aviation

Dundee, Scotland, recently held an informal jollification over the first commercial flight carried out there by aeroplane. A business man had flown from Glasgow, landed in a field near Dundee, completed his deal and within an hour was on his way back by air. As a result of the visit, Dundee is joining the movement to provide an airport for every city in Scotland.

Women are not allowed to appear without a hat in English courts.

Heart and Nerves So Bad
Was Unable To Sleep For Hours

Miss Theresa M. Ravary, Gallingertown, Ont., writes:—"I was troubled, for almost a year, with my heart and nerves, especially on retiring at night when I would be unable to sleep for hours. I was easily fatigued, and became very excitable and irritable. A friend recommended Milburn's Heart and Nerve Pills and after taking them for a few weeks I could enjoy a good night's rest, and rapidly regained my former state of health."

End Of Communism

McGill Economist Sees Soviet Despotism Foiled By Human Nature

"Russia is going to break. Communism will prove unavailing, the five-year-plan is doomed to failure, and the greatest despotism and tyranny that the world has ever seen will be foiled by human nature," declared Dr. Stephen Leacock, head of the department of political economy of McGill University, addressing the junior board of trade of Montreal recently on Communism.

The professor issued a warning that police batons were not the correct means of destroying Communism in Canada. "The needs of the people which lead them to seek after anything new must be satisfied as the first and only step required to do away with this evil," he said, referring to Communism in this country.

"What was going to happen to Canada and other parts of the western world before Russia's five-year-plan dated, Dr. Leacock asked. "Are we going to sit back and condemn Communism and do nothing to cure the evils of present-day civilization? Are we to permit Russia to set us and the rest of the world an example in energy and determination in the exploitation of their country?"

Military Medal Law Revised

Holders Of V.C. Cannot Be Automatically Deprived Of Decoration

Holders of the celebrated Victoria Cross, highest award for gallantry in the British army, will not, in the future, be automatically deprived of the medal if convicted of "treason, cowardice, felony or any other infamous offence," as has been the case in the past.

This important change is one of the new rules governing military medals announced in the London Gazette. It is stipulated, however, that the award of the V.C. may be cancelled by the King, who may also restore the decoration, if and when, the recommendation for annulment is withdrawn.

BREAKS UP GAS IN THE STOMACH

Don't suffer from dangerous gas pressing around your heart, from soureness, acidity, bloating or pain of indigestion. Stop worrying. When-ever you need quick stomach relief, take a little Bisurated Magnesia, powder or tablets. It breaks up gas, relieves sour, acid and keeps the stomach sweet and strong, and indigestion perfect. At all good drug stores.

A Dangerous Weapon

Germany Is Replacing Beer Steins With Paper Cups

Beer mugs always have been dangerous weapons in Germany. Now no longer will political gatherings break up with the air filled with flying beer mugs. The Berlin police have issued an order that when politicians get together there shall be no stein on the table, but paper cups instead.

This is going to remove a good deal of the dramatic from Berlin cafe conferences. But it should bring relief to overworked hospitals, which usually have a number of injured to patch up after a Fascist or a Communist meeting. So much of a dent in the human anatomy can be made with a paper cup.

SELECTED RECIPES

PARKER HOUSE ROLLS

2 cups scalded milk.
1 tablespoonful salt.
1 yeast cake.
4 tablespoons "Mazola."
4 tablespoons sugar.
½ cup warm water.
8 cups flour.

Scald milk and when cool add yeast dissolved in warm water. Stir in milk, "Mazola," salt and sugar. Add three cups bread flour and beat well, then let rise in a warm place until doubled in bulk. Cut down and add three more cups of flour. Knead until dough no longer sticks to fingers, then let rise again until doubled in bulk. Roll out and cut with round cutter. Brush over with "Mazola" and fold over. Bake in oiled pan in quick oven.

The worms that infest children from their birth are of two kinds, those that find lodgement in the stomach and those that are found in the intestines. The latter are the most destructive, as they cling to the walls of the intestines and if not immediately dislodged, will remain there. Miller's Worm Powders dislodge both kinds while expelling them from the system serve to repair the damage they have caused.

Half and Half

A lady much above the usual size was trying to enter a street car. A passenger, who was waiting to get on, began to laugh at her futile efforts.

"If you were half a man, you'd help me on this street car," snapt the fat lady.

The passenger retorted, "Madam, if you were half a lady, you wouldn't need any help."

Flowers of many forest trees are important sources of pollen for honey bees.

Mid-Summer Cruise

All Europe Cruise Of the Cunarder "Lancastria" Offers Wonderful Opportunity

An important and unusually interesting mid-summer cruise to all Europe, sailing in the Cunarder "Lancastria" from New York on June 30th next, has just been announced by the Cunard Line, and Frank Tourist Company, joint sponsors of this new cruise.

The itinerary of the "All Europe" cruise reaches from the sunny shores of the Mediterranean to the beautiful Sogne Fjord, in far Norway, at its best and most beautiful at that time of the year.

Every country in western Europe with the exception of land-locked Switzerland will be visited by the "Lancastria" in the 51-days of her "All Europe" cruise. Among the striking points in the plans for this cruise are included a excursion to Rome at no extra cost, a trip on the big Cunarder through the Kiel Canal which presents magnificent scenery on every hand, and a call at Copenhagen, the attractive and sophisticated capital of Denmark.

Liberal stays at many places visited will permit not only of an unusually comprehensive programme of shore excursions without extra cost, but also a number of inland trips for those who wish to amplify or extend their visit, and will appeal greatly to experienced travellers who will be making the cruise.

California Protects Its Fruit Industry

May Prohibit Banana Imports So People Will Eat Home Grown Fruit

The State Legislature of California is seriously considering the prohibition of the import of bananas. For why? Not because the banana is grown in California and so the import of the foreign-grown banana would interfere with the home-grown product. The argument for prohibiting the importation of bananas is in the logic of the fact that the eating of bananas as the protectionists of California see it, means less eating of peaches and other fruit grown in the State, so the eaters of bananas have to curb their sinful appetites when it comes to their favorite fruit. To make it easier for them to do this there are to be no more bananas in California if the legislature has its way—let those who have their way.—Lethbridge Herald.

Three Famous Indian Chiefs

Village, Lake and Railway In Alberta Bear Their Names

In Alberta, the names of Crowfoot village and lake and the Mosquito Railway Station are tributes to the worth of Indian chief who, on the coming of the white man, ceded their title to vast areas and lived in peace thereafter. Crowfoot, head chief of the Blackfeet, was a keen business man who kept his tribe at peace with the whites, while Mokasto, or Red Crow, head chief of the Southern Bloods, was loyal to the Queen's representative. Chinfki was a noted Stony Indian chief.

Persian Balm imparts a rare charm and distinction to the woman who uses it. Its delightful fragrance lingers discreetly cool to the skin. It always relieves its complexions delightfully young and lovely. Indispensable to every dainty woman. As a powder base for oily-textured skins or as a beautifying lotion, it is unrivalled. Free and attractive booklet. Recommended also to soften and make the hands flawlessly white.

Good Price For Livestock

The Manitoba Agricultural College recently shipped three baby beeves to the Union Stock Yards market, which established a new season record. The beeves averaged 900 pounds and sold for $8.00 per hundredweight.

A scientist who studied the workmanship in stone blades made by prehistoric Indians concluded that the Indians were left-handed—an evidence borne to a greater degree than civilized men.

Siam's automobile registration has doubled in the last five years.

A Job For Canada

China Offers Great Trade Possibilities But Market Must Be Created

Canada must go after world markets, and Western Canada must act as a unit in getting such markets.

Those are the principles laid down by Premier Bracken, of Manitoba, in urging that Canada appoint a minister to China. "We have been playing the trade game with our eyes shut," he declares.

Certainly, as far as the Orient is concerned, Canada and the whole western world has kept its eyes shut to certain obvious truths. Canada without a minister in China is like a business man going to work blindfolded. China with her half billion souls, is the greatest potential market in the world.

But two things are needed. One is the power to buy and the other is the desire to buy. The power to buy is an international problem. The desire to buy, where Canadian goods are concerned, must be created and fostered by Canada herself. No one else will do it for her.

Canada's minister to China must be both a business man and a diplomat. His will be the mighty task and the mighty opportunity of doing the good work in an immense field of commerce. He must be able to tell China about what we have to sell that she needs, and tell Canada about what the Chinese can and want to buy. Most of all he must develop a business relation between the two countries that will mean the saving of millions of dollars' worth of goods when China recovers her stability. — The Vancouver Sun.

Art Contest To Show Growth Of Dominion

Seventeen Hundred Dollars Offered In Prizes For Prosperity Design

To the Canadian artists whose completed design best conveys the picturesque message that Canada is forging ahead, that economic handicaps resulting from world conditions are being overcome and that Canadian prosperity was not to be fostered by the purchase of Canadian-made products, a group of the Dominion's industrial interests is offering an award of $1,000 in cash. Seven other artists selected by the judges additional awards of $100 each will be made.

Details are announced by W. F. Prendergast, chairman of the committee in charge of the contest. "March Forward With Canada" as the basic theme and the competition is one item in a "prosperity drive" which Canadian manufacturers plan to inaugurate.

The awards are offered for competition to all Canadian artists and each entrant may submit as many designs as he desires. The designs should be miniature color sketches, suitable for general reproduction.

From the miniatures entered, eight artists will be asked by the judges to submit larger drawings. The designs are to include no advertising for individual firms or industries, but to be applicable to Canadian business and industry in general.

Giant X-Ray Tube

Will Be Used In the Treatment Of Cancer

A giant X-ray tube, developing 600,000 volts, has been developed at the California Institute of Technology, for treating patients suffering from cancer, a formal statement issued by the Institute announced.

The statement said that, "As Dr. Robert A. Millikan has previously stated, the institute does not profess to have discovered a new cure for cancer; the principal hope is, that if results are favorable, other tubes of similar type will be placed in operation in hospitals in other sections of the United States."

Rubber Wheels For Dining Cars

The possibility of rubber dining car wheels is being studied in France by representatives of the principal French roads. Experiments are being conducted on a Pullman car at St. Florent. Gasoline-driven engines with rubber tires have been operating for several months, and experts believe that their adaptation for passenger cars also will lessen noise, shocks, and deterioration of the rails.

To have the children sound and healthy has first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Powders.

Should Look After Himself

A traveller in the Orient asked a pasha, "Is your civil service like ours? Are there retiring allowances and pensions?" "My illustrious friend," replied the pasha, "the public functionary here who stands in need of a retiring allowance when his term of office expires is a fool!"

Perhaps the world may owe you a living, but you will die of starvation if you sit down and wait for it to call and settle.

"Charlie Chaplin still refuses to make a talkie," we read. He thinks he is too funny for words.

Spain produced more than 725,000 tons of olive oil last season.

New Canadian Destroyers

Two New Vessels To Be Added To Canadian Navy

Delivery of the first of Canada's new destroyers, H.M.C.S. Saguenay, will be made to this country very shortly. A number of tests have still to be made, but it is expected that a Canadian crew will be put on board the warship soon, and she will formally pass into the hands of the naval service of this country.

For the most part the ship's company is already in England. From time to time in the past few months Canadian shipjackets have proceeded to the United Kingdom on courses of instruction in the Royal Navy, nearly 200 officers and ratings are thus ready to take over the new destroyers as soon as they are delivered from Thornycroft's.

The second vessel, H.M.C.S. Skeena, will be turned over about May 20.

The new destroyers are the last word in construction of that type of vessel, incorporating many new features that have been developed since the war. Specifications called for a speed of 35 knots, but in her trials "Saguenay" has exceeded that. Both are equipped with turbine engines. Their armament comprises four 4-inch guns and two 4-tube torpedoes. About 100 officers and ratings constitute the ship's companies.

Proposes New Study For Canadian Schools

First-Aid and Home Nursing Useful Subjects, Says Colonel Hodgetts

First aid and home nursing should be made subjects in public schools, declared Col. C. A. Hodgetts, director-general of the St. John Ambulance Association, at the annual meeting of the organization in Ottawa. This type of training would, he said, be more useful than "some of the twaddle" now being taught.

The year 1930 was described as surpassing all other years in the history of the association in Canada. In various courses, 23,382 persons took part and proficiency certificates were awarded in 13,656 cases. Certificates and awards had a grand total of 19,748. The annual report was presented by Hon. J. H. King, president.

Extend Heating Plant

The Winnipeg Heating Co. has made application to the city of Winnipeg for the extension of its heating plant to take in another large area. The estimated cost is $1,000,000.

The heart of an insect is reversible, sending the blood backward as well as forward.

Time Has Been Extended

For Negotiations Regarding Equipment Of Railway Cattle Cars

An extension of the period in which negotiations might be carried on between the Railway Association of Canada and representatives of livestock shippers in order that they might reach some agreement in connection with equipping railway cars with facilities for the better transportation of livestock, has been granted by the board of railway commissioners.

The problem of shipping cattle to the various markets with a minimum of injury was presented to the board three months ago. An investigation that equipped cattle cars with a movable partition was suggested both as a time saver and as something that would reduce losses in transit.

A Hazardous Calling

Many Movie Actors Lose Lives In Making Pictures

Packing thrills and realism into the movies is brought with deaths and accidents often as tragic and thrilling as the scenes depicted. During the last five years, fifty-three actors, extras and studio workmen have lost their lives in making pictures, and scores of others received permanent or temporary injuries in the effort to provide "hair-raisers" for movie fans. In addition, the California state industrial accident commission paid out $421,-580 to members of the motion-picture industry for deaths and accidents arising in the course of employment.

The Size Of Eros

Tiny Planet About Twenty Miles Long and Eight Wide

When the tiny planet Eros made his recent visit within seven million miles of the earth "he" was observed by astronomers in all parts of the world. As a result we now know that the only asteroid with a masculine name is not round but elongated or egg-shaped. As announced by the director of the Harvard Observatory, the baby planet is about twenty to twenty-five miles long and eight to ten miles wide.

To First Address

Categorized as a "speech of international importance," one thousand copies of the recent address of Hon. Hugh Guthrie, Minister of Justice, before the American Bar Association, are to be printed in the records of the United States senate, it was learned recently.

London has a war over modern art.

Foods Stay Fresh Longer This Way

Prairie Provinces May Obtain Deep Sea Fish Requirements From Hudson Bay Region

Western Canada's hope for a steady supply of fresh fish from Hudson Bay and Strait seed not be dashed by the discouraging report issued late last year by the trawler expedition which spent the summer in the bay.

This expedition caught no fish, but in the fisheries department at Ottawa this fact is not regarded as a knockout blow to the project of a fishing industry in the northern waters. On the contrary, Hon. Edgar N. Rhodes, the Minister of Fisheries, says he will be much surprised if in due course Hudson Bay and Strait do not give the west a steady supply not only of river fish but of deep sea fish.

Mr. Rhodes is a Nova Scotian who has been immersed in the politics of that province most of his life, and has had charge of the Dominion fisheries only since August last. Therefore he admits a lack of detail knowledge about the fish resources of Hudson Bay and Strait. He knows, however, that the estuaries and rivers running into the bay contain plenty of edible varieties and he expects that a supply of deep sea fish will be available from the Straits. Last summer's expedition did not touch the rivers or the strait.

Discussing welfare fisheries, Mr. Rhodes recorded that the transfer of the natural resources had taken the lake fisheries of the prairie provinces the jurisdiction of his department. Fish in the prairie lakes and streams will henceforth be hatch, eggs and be caught under the aegis of provincial authorities. The Dominion department is ready to give aid in solving the technical and selling problems of the lake fisheries, but its primary concern now is with the coasts. There have been only two coasts up till lately, the Atlantic and the Pacific, but the opening of the Hudson Bay Railway brings a third into the picture.

No one has a more difficult fisheries problem than Canada, thinks Mr. Rhodes. A great majority of Canadians live more than 3,000 miles from the ocean. They get much less fish per head than the British people, and Mr. Rhodes believes they ought to have more fish dinners to balance their diet properly.

The problem is to get the fish to them while fresh. Mr. Rhodes hopes to see Hudson Bay and Strait fisheries play some part in solving this difficulty in the Canadian middle west.

Help Make Canada Beautiful

Everyone Can Do Their Part By Beautifying Home Grounds

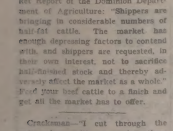
"Beautify your home grounds and help make Canada more beautiful" is the slogan which has been adopted for a campaign to develop personal interest in ornamental horticulture throughout the Dominion. Taking the initiative in the campaign the Canadian Horticultural Council, with the co-operation of the Federal Department of Agriculture has issued its experimental farms branch, has had a booklet dealing with every phase of "Beautifying the Home Grounds of Canada" prepared by a Canadian architect of outstanding ability. This is essentially a practical text book on the subject, and not only describes plans and illustrations especially suited to Canadian conditions, but complete glossary of plants, shrubs, trees and ornaments of Canada are particularly adapted for Canadian usage. A fee of twenty-five cents is charged for this book, which is being distributed through the publication branch of the Department of Agriculture, at Ottawa.

Feed To a Finish

Farmers who are feeding cattle for beef should note carefully the following excerpt from the Live Stock Market Report of the Dominion Department of Agriculture: "Shippers are bringing in considerable numbers of half-fat cattle. The market has enough depressing factors to contend with, and shippers are requested, in their own interest, not to sell unfinished stock and thereby adversely affect the market as a whole." Feed your beef cattle to a finish and get all the market has to offer.

Gentleman—"I cut through the motor boat with an oxhyacetylene torch and then used dynamite."

Judge—"Two years! Wait a minute—could you get a clinker out of my furnace for me?"



"Splendid—you will soon live in a foreign villa."

"Yes, but as minister or monk?"—Montreal Passing Show.

The Average Age

Men Usually Marry At Twenty-Five Or Younger

Queen's University Journal reports a professor as saying that the average man of today does not marry until he is 30 or 35, as he is seldom financially secure before then. The report may be inaccurate, but the statement, as reported, is one frequently made and perhaps widely believed. Yet it is quite unwarranted.

Out of 25,728 grooms who married in Ontario, in 1928, those who had reached 30 years or more numbered only 7,575, or about 30 per cent. of the total. And of these only 2,822, or about 15 per cent. of the total, were in the age group 30-35 inclusive. More than 50 per cent. of the grooms were under 27 years of age, and if second marriages were eliminated from the total, it would probably be found that half of the men who marry for a first time do so before they have passed 25.

The "average man" who waits until he is 30 or 35 is not an average, but an exception.

Honey Is Always Safe

Most Disease Organisms Cannot Live In Honey

In a recent statement a bee expert of the Dominion Department of Agriculture, commenting on the fact that honey is always safe for human consumption. The reason for this is that most disease organisms that affect man cannot live in honey, which draws the water of their construction from them and kills them. While there are some diseases affecting bees and bee broods, this does not impair the value of the honey for food purposes, which affect bees have absolutely no effect on humans

FAVORITE BECAUSE OF ITS YOUTHFULNESS

This pregnant model is especially nice in printed crepe silk for street for spring.

The shoulder capelet adds much charm and daintiness. And into the bargain the dress may be cooler because the cape covers the upper part of the arms for more formal wear or for resort.

The skirt is slightly flared and shows a fullness through the hips.

Style No. 206 may be had in sizes 14, 16, 18, 20 years, 36, 38, and 40 inches bust.

Printed or crepe silk, crepy woolen in plain or print, many rayon novelties, well chosen prints, linen, dotted Swiss and chiffon are lovely for this model.

Spring, the season of prettiest styles, will soon be here. Prepare now for spring by a copy of our Spring Fashion Magazine. Attractive styles for women, misses and children. And instructive lessons in sewing.

Price of book 15 cents.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Machine Age On Farms

U.S. Farmers - Visualize Robots Invading Pasture Lands

The machine age and all its dreaded paraphernalia have cast their shadows over the peaceful farm and pasture lands, according to more than ninety up-state farmers visiting the farmers' week conference at Cornell, New York and vicinity, who passed a day inspecting the highly mechanized laboratory of the Walter-Gordon milk farms in Plainsboro, N.J.

In an atmosphere so shorn of all the bucolic charm, the farmers saw the milking machine, with its stainless steel pails and finely combed hides match in perfect parade formation to be milked by an electric machine.

The mechanical milkers can be the result of more than a quarter century's experimentation and research to produce milk of superior quality and nutritional value. The well-behaved cows are milked after they have been properly ensured and fed. The daily output of milk amounts to more than 18,300 quarts.

The cows have a day at appointed hours, after they have been fed specially dehydrated forage crops generously sweetened to suit their delicate palates, and are then smell-mannered Holsteins, Guernseys and Jerseys take their turns to a line leading to the revolving platform supporting fifty stanchions of pleasantly colored tile and enamel. Within twelve minutes a cow has been milked and cleaned and dried with sterilized towels before she returns to an individual shed upholstered with a view to making the greatest comfort modernity has to offer.

After watching this amazing performance one farmer sighed, "It won't be long now before all our farms are run by robots."

Butter Production Increases

But Production In Canada Not Yet Sufficient For Domestic Consumption

Butter production in the three prairie provinces is showing substantial increases, Joseph Burgess, chief of the division of dairy products, butter and cheese branch, on his arrival at Saskatoon.

He said that the increase in Saskatchewan was 78 per cent. Alberta, 83 per cent., and Manitoba 58 per cent., while substantial increases had also been recorded in Eastern Canada and British Columbia. Mr. Burgess stated that despite the large increases recorded the butter production of Canada was not yet sufficient for domestic requirements. He predicted that large increases in production during the coming year, but did not think there would be any surplus available for export. Burgess said that some trial shipments would be exported, but that it would be some time before the exports would reach any appreciable total.

Keeps Fruit Fresh

Rapid Freezing Process Is Now Used Very Successfully

Some interesting observation with respect to the application of "quick freezing processes" to perishable fruits and vegetables is contained in the current newsletter of the Dominion Cold Storage Branch. Tests recently made with peaches show that the process preserves all the original nutritive values and mineral salts with no evidence of loss of valuable chemical constituents or flavour. The process seems to keep the fruit absolutely fresh. In fact, 40 out of 45 "tasting tests" reported the "frozen" peaches more juicy, sweeter and of better flavour than that of "fresh" peaches.

In British Columbia experiments are being made in the "rapid freezing" of peas in small cartons. These peas will be held in storage at a temperature of 35 degrees Fahrenheit before zero until marketed next winter.

Poultry Feeding

Should Use Canadian Grown Grains For Poultry

To meet the present acute feed situation the Poultry Division of the Dominion Experimental Farms have made a study of the suitability of substitutes from grains for poultry feeding. With the use of suitable substances in the form of cod liver oil and grain feeds barley is found to be as good as yellow corn for egg production. In a special pamphlet (No. 126—New Series) just off the press complete instruction in the use of domestic grains for poultry feeding is given. There is no charge for this pamphlet, which may be obtained upon application to the Publications Branch of the Department at Ottawa.

Power From Sun's Rays

Scientists hope to utilize the sun's rays in power plants in time. It has been estimated that enough sunshine falls on a house roof to supply the power needs of an average family, the solar radiation is equal to 7,000 horsepower an acre.

Judge—"How did you come to embezzle this money?"

Accused—"I needed the money to pay off a debt of honor."

Christmas is not a holiday in Kansas.

Naturalization Act To Be Amended

Bill Is Before the Ottawa House Designed To Remedy Unfair Conditions

First reading was given in the House of Commons to a bill designed to amend the Naturalization Act. Hon. C. H. Cahan explained several anomalies existing under present conditions. As the laws of Great Britain and the Dominions and it, the wife of a British subject was deemed to be British, while a British-born wife of a foreigner assumed the nationality of her husband.

This did not operate well in view of the fact that in the United States a woman, not of American birth, marrying a United States citizen was not by virtue of her marriage admitted to United States citizenship. She continued to be regarded in that country as a foreigner.

Consequences were that hundreds of women in Canada, who had forfeited their Canadian citizenship by marrying Americans and at the same time, not being accepted by the United States as American citizens, were without a country and were unable to secure passports.

Recommendations for the correction of this situation had been made at The Hague convention of 1930, and it was pursuant to these recommendations that the present bill was introduced.

Marketing Of Cattle

Central Council With Representatives From Each Of Prairie Provinces Is Formed

Decision to form a central council of two representatives from each prairie province to assist in handling and marketing cattle, was made by the directors of the Western Stock-Growers' Association and representatives of the British Columbia Beef-Growers' and the Saskatchewan Stock-Growers' Association at a recent meeting in Calgary. Several lines of activity, including the compiling of accurate statistics regarding potential marketings and organization of existing and new avenues of outlet were suggested as work of the newly-formed council.

In Planting Grass

Proper Preparation Of the Soil Is Essential To Success

The fine seeds of grasses and legumes require a firm soil that is not in lumps, and moist. They are very small in size and if seeded too deeply will produce plants which either lack in vigour when they emerge above the ground or are completely smothered. The soil should be firm so that the seed will not be buried too deeply and so that moisture will be near the surface to facilitate the germination of the small seeds before the nurse crop becomes sufficiently well established to smother the small seedlings. —Experimental Farms Note.

Have To Prove It

When Paris commuters tell their boss their train was late, they have to produce documentary evidence in support. Every time a train from the suburbs is delayed, officials give out slips on which are shown the time and place of departure and the exact time of arrival at the terminus.

Women In Big Business

Saskatchewan Poultry Pool Is Largely Conducted By Women

Are women capable of operating a big business? They have demonstrated that they are in the Province of Saskatchewan. The majority of the directors of the Saskatchewan Poultry Pool Ltd., are women. For several years they have directed the Pool with conspicuous success. For the year ended January 31, 1931, the Pool did a gross turnover of $815,000, according to the report of Mrs. Bertha Holmes, of Asquith, Sask., who was president last year. The business in 1930 showed an increase of nine per cent. over 1929, and 64 per cent. over 1928. Last year 877 carloads of eggs and poultry were marketed.

All the members of the pool are farmers and farmers' wives and daughters. It is a co-operative organization. This year's president is Mrs. N. Morrison, of Spalding, Sask.

Bay Approved Chicks

Approval Policy Established As An Outstanding Achievement

In carrying out its Poultry Club Campaign among Quebec farmers the province's government has authorized the purchase of "day-old-chicks from approved hatcheries only." This is a splendid endorsation for federal approval policies, which all combine to produce the "approved" chick. The Poultry Division of the Dominion Department of Agriculture supervises the now officially recognized "approval" policies, which include Record of Performance, certification and registration, flock approval, hatchery approval and approved chicks. Government supervision is the safeguard which has established the approval policies as the outstanding achievement in the poultry industry in recent years.

Holding Doesn't Pay

Farmers Urged To Market Eggs In Very Best Condition

Holding eggs for a "rise in the market doesn't pay, as a recent report from federal inspectors at Winnipeg clearly shows. It reads: "The majority of receipts are of good quality, although some held eggs are in evidence. These invariably grade second, showing the fallacy of holding perishable products for any length of time in anticipation of a higher market." At the time this report was received the spread of extras over seconds was five cents per dozen. The Eggs Marketing Service of the Dominion Department of Agriculture urges farmers to market their eggs in the very best of condition, which naturally is no easy affair by keeping as possible, so that they will get the benefit of official grading.

"Millionaire's Peak"

In the northwestern part of Waterton Lakes National Park, Alberta, is the curious Anderson peak, with its sharp pyramid formed of yellow shales, which at sunrise and sunset glisten like pure gold, so that the mountain is facetiously known as the "Millionaire's Peak." Waterton Lakes National Park is noted for the colouring of its rocks.

White gold is ordinary gold containing alloys which make it appear white.

TAKES OVER DUTIES AT CAPITAL

The photograph above shows M. Arsene Henry, France's new minister to Ottawa, and Mme. Henry, as they appeared aboard the liner that brought them from their native land to New York. M. Henry arrived in Ottawa, March 11, to take over his new duties.—Associated Press Photo.

Coal Consumption In Canada Has Decreased And Drop Attributed To Increased Use Of Electricity

Tin Mines Intensely Hot

Even Chinese Coolies Can Only Work Few Months

So interesting and so picturesque are some of the methods of tin mining and so beautiful are the environments, that a tourist agency in Singapore now offers to wind up clients' round one or two tin mines while they are in Malaya. But visitors, on the whole, are few, the heat even on winter days effectively protects the secrets of the mines.

The quickest and most efficient means of tin mining today is dredging. There is something hypnotic about watching the buckets ceaselessly rise from the yellowish water. Often they bring up things other than clay—trunks of trees, relics from another jungle long buried and often a snake.

It is mostly at night, when the dredge wheezes and sighs in a blaze of illumination that the snakes come aboard. Grey-black cobras, python, bright green snakes, and snakes that glisten like the moon—the last horrible but harmless. Only the night before a sleepy python had suddenly found himself suspended over two buckets and being carried swiftly upwards. Chinese coolies had half killed and half stunned him before he realized what had happened.

Hot though it is under the corrugated iron roof of the dredge, this is as a breath of heaven compared with the interior depths of a lode mine. Even the Chinese coolie, the hardest worker in the world and the strongest, can only bear the incredible heat of those deep mines—there are not many in Malaya—for a few months.

Tropical wild flowers and flowering trees blazed round the top of this particular mine. Round it all the jungle pressed, waiting patiently for man to cease his endeavors here, so that it might once more people the little clearing with the grotesque shapes and gaunches. The last thing I remember seeing before the cage descended was a tendril of orchids and one great yellow flower, studded with scarlet, like a painted face.

There are pleasanter ways of obtaining than deep mining. The cockle gathers the ore by playing a monitor—really a majestic kind of garden hose—on to a cliff of tin-bearing ground. A jet of water, at a pressure of 200 pounds or more, smashes the ground away like artillery.

Artillery indeed it is, for one cockle playing the monitor against the cliff saw two greenish eyes regarding him from the right. Only the inhabitants of the jungle had eyes like that, the cockle knew, and more in terror than in judgment he turned the "hose" on the eyes. There was a roar, and silence. In the morning, they found the lacerated body of a tiger, so brown that even his skin was valueless.

Safeguard For Waiters

New Invention Causes Door To Open Without Trouble

A door which opens of its own accord based on the "invisible ray" principle, has just been put into operation at "Oxford." About 10ft. away from one of the service doors on the first floor a light has been made to shine on a photo-electric cell suspended opposite, and when a waitress approaches this door she passes across the line of light and breaks it for a moment. This gives impulse to an amplifier on the other side of the service door, and this impulse operates on a delicate electrical apparatus in such a way as to cause the spring cull attached to the top of the door to draw back, and the door opens.

Bermuda Stands Pat

The upper legislative council of Bermuda has rejected the measure which the lower council had passed permitting physicians on the island to use automobiles while calling on patients. So the old remains. The tourist trade has always been free of the modern automobile, will keep its freedom. And somehow we are glad. It is good to think that even where in the world is a place where motors are not, and motor horns never rack our nerves.

Excuse Did Not Work

The motorist adopted pleading tactics.

"I wish you'd overlook it this time, constable," he said. "As a matter of fact, I was hurrying to town on very important business."

"Fraid I can't help that," said the policeman.

"I never drive fast as a rule. But I've got to get to town quickly to see my solicitor—"

"Well," said the policeman, "you'll have a bit more news for him now."

"How quickly our new maid moves about," said the husband. "You wouldn't think she was in the house."

"She isn't," came the wife's reply. "She left this morning."

Russia's powerful broadcasting station near Moscow will cost $35,000,000.

Coal consumption in Canada has decreased approximately one-half a half million tons in the past year.

Statistics now available show the quantity of coal made available for consumption in Canada, in 1930, was 31,565,880 tons the preceding year. This decrease is due to several causes, one of which is the increasing use of electricity as a medium of power for operating factories, newsprint mills, saw mills, etc., and to the increase usage of water power instead of electricity. Of the total power used in manufacturing industries in 1928, it is estimated 72 per cent. was electricity. In 1929 and 1930, this percentage is expected to have been greater.

It is estimated electric power has displaced the consumption of coal in Canada to the extent of 4,000,000 tons in 1930. This estimate is based on the average coal consumption per kilowatt hour of all public utility electric power plants in the United States during 1929, which places the equivalent of coal to electricity at 1.38 pounds of coal per kilowatt.

While the consumption of coal last year shows a decrease, the output of central station generating stations has increased from 18,014 million kilowatt hours, in 1929, to 18,256 million in 1930. The large stations generating approximately 96 per cent. of the total electrical output, generated 1,242 million kilowatt hours by steam power in 1930 as compared with 331 millions in the preceding year.

Figures issued by the Dominion Bureau of Statistics of Canada during the past week indicate a continued downward trend in wholesale and retail prices, a definite upwards movement in the prices of industrial stocks and utility common stocks as well as mining stocks, and no changes in the index number of interest rates calculated from the yields of the most popular bonds.

Prince Albert National Park

A Number Of Summer Homes To Be Built This Year At Northern Resort

Construction in Prince Albert Park will be abnormally heavy this year, judging from present indications. A Saskatoon citizen, whose name has not been disclosed, intends to erect a $10,000 summer home at Prospect Point, park residential subdivision. Nine others intend to erect cottages, the average cost of'b be $2,000. This information was given out by J. A. Wood, superintendent of the park. Additional accommodation for those who do not care to erect their own cabins and a number of business buildings will also be erected this summer.

While the program of park development work for the summer will be depends entirely upon what money will be available in the department of interior appropriations. No definite information in this regard is yet available.

Proving Its Worth

Cow Testing Essential To Success In Dairy Farming

In these days when efficiency in production is so essential to success in farming, whether on a large or small scale, cow testing is proving its worth. Only weighings of milk and cream arouse a farmer's interest in his dairy herd and encourage him to give attention to those little details so essential to success. As pointed out by periodical visits by the Dairy Promoters and "fat" tests daily weighings provide a reliable basis for profitable feeding and increased production.

The "boarder" cow who will not earn her keep even with the best of feeds can be weeded out and the production from good cows increased.

Department of Agriculture, Ottawa.

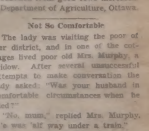
Not So Comfortable

The lady was visiting the poor of the district, and in one of the cottages lived poor old Mrs. Murphy, a widow. After several unsuccessful attempts to make conversation the lady asked: "Was your husband in comfortable circumstances when he died?"

"No, mum," replied Mrs. Murphy, "he was till yaw under a train."

Salesman—These shirts simply laugh at the laundry, sir."

Customer—"I know. I've had some come back with their sides split."



"I have tickets for the theatre."

"Good, I will start dressing at once."

"Do dear, they are for tomorrow night."—Il Travaso, Rome.

WORLD HAPPENINGS BRIEFLY TOLD

Hon. Maurice Dupre, solicitor-general for Canada, has been made a Knighton Kings Counsel, according to the Canada Gazette.

The Pacific Great Eastern Railway in 1920 absorbed a loss of more than $61,000 in its operating revenues, according to a report presented to the British Columbia legislature by Premier S. F. Tolmie.

Notice of a resolution calling upon the government to bring in the eight hour day throughout Canada has been placed on the order paper of the House of Commons by Hon. Peter Heenan, former Minister of Labor.

Charles Vinay Helliwell, soldier and dentist of Woodstock in the first Red River expedition in 1870, is dead, aged 84 years. The veteran soldier also participated in the Fenian Raids in 1871.

The Old Clover Point Rifle Range, a three-quarter mile strip of natural sea frontage, has been leased to the city of Victoria for park purposes by the federal department of national defence.

Less economy and more spending were suggested by Rt. Hon. Arthur Henderson, Foreign Secretary, at a luncheon in the England, as the best methods for reviving trade and industry. He declared the world was suffering from "too much economy."

Mahatma Gandhi has refused to allow his admirers to immortalize him in stone. He said money which might be spent in such a statue could far more appropriately be devoted to "ameliorating the deplorable condition of the poor."

More than 835,000 automobile accidents occurred in the United States last year, and they killed 32,500 persons, and injured 962,000, the Underwriters' Insurance Company reports. Deaths increased 4.5 per cent. over 1929.

A report upon the ice cream industry in Canada for 1929 shows that during thirteen years the production of this commodity has increased by 279 per cent. and its value by 222 per cent., the amount in 1929 being 9,797,436 gallons, and the value $13,-604,706.

Western Air Tour

Proposals Under Way For Working Out An Ambitious Programme

The Canada Aero Association is lining up behind the proposal for a Western Canada Air Tour this summer. They are in communication with other flying clubs and working out a very ambitious programme that will give the prairie sections a much more active stimulus than that shown by the National Air Tour last fall.

It is more than likely that the tour will start from Winnipeg during the first week in July and take a swing around the principal cities of the West with Brandon the last port of call on the return trip, with the intention if at all possible to stage a two-day meet here. All flying clubs are being asked to contribute 'planes for the flight, and manufacturers are expected to have machines available. It is proposed that something spectacular in the way of thrilling stunts in the air be staged to attract large crowds to the tour stops.

No Wonder

The teacher was trying to explain to the class the significance of white. He asked:

"Why do you think a bride always wears white on her wedding day?"

No one answered.

Teacher—It is because white betokens happiness, and her wedding day is the happiest day of a woman's life."

Small Boy—But why does the man always dress in black?

Tourist—"I've always longed to live the wild, free life of a cowboy. like I've seen in moving pictures."

Cowboy—"So have I."

The Best Of Luck

American Soldier Receives Fortune From Father Of Frenchman He Befriended

The best of luck, which soldiers used often to wish one another in the Great War, has befallen one of them who helped another when his luck was out. The luckless one was a French poilu who had been severely wounded in the last great move in 1918. An American doughboy brought him out of danger, bandaged him, exchanged cards with him, and wished him the best of luck. The American boy never expected to hear from him again. But he has just received a letter from Paris to say that the young Frenchman's father has left him $60,000 in his will. One American, at any rate, had the best of luck in the war.

Trading In Ivory

Tons Recently Bought In London, England, At Special Sale

Nearly forty tons of elephants' ivory from Africa and Asia were sold recently at a special sale at Mincing Lane, London, England. Over seven hundred elephants contributed to the collection of tusks, which was valued at many thousands of pounds. The average tusk of an elephant is about fifty pounds in weight, and is worth about $150. London is recognized as the headquarters of the ivory trade although of late years Antwerp has become an important centre for African ivory. Sales take place in Mincing Lane quarterly, and hundreds of manufacturers gather for it. Sales also take place in Liverpool.

SMART JUMPER DRESS

Today's cute dress style is quite individual.

The tiny French bodice is designed with deep "V" at the front and at the back. The skirt is comfortably full to allow sufficient freedom that small folk need for playtime. Joined to the yoked bodice in soft gathered fullness gives a very dainty effect.

The gulmpe is fetching with Peter Pan collar and barn-sack sleeve cuffs. When the warm weather arrives, the little gulmpe may be discarded.

The sturdy bloomer dress is baby blue and white gingham check with white bastex for the gulmpe.

No. 211 is designed for tots of 2, 4 and 6 years.

Percales, prints, cotton broadcloth prints, linen, pique, percales and many other make up nicely and are practical as well.

Spring, the season of prettiest styles, will soon be here.

Now by ordering a copy of our new Spring Magazine, attractive styles for women, misses and children. And instructive lessons in sewing.

Price of book 15 cents.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Football In Schools

Campaign Started To Organize School Teams Throughout Saskatchewan

(NOTE—This is a copy of a report submitted by Mr. O. J. Hopkins, of Anerley, to the President and Executive of the Saskatchewan Football Association, with a request to that body to apply to the Saskatchewan Government for a substantial grant from the Provincial Government for inclusion in the next Budget. This will require immediate attention.)

Organize all towns, villages and hamlets as potential centres of development on the existing plans of the C.P.R. and C.N.R. in Saskatchewan.

Competitions: (a) Public Schools; (b) High Schools.

The game of football (commonly called soccer), is a typical British game, but is internationally played and is included in the list of competitions in the Olympic Games. It is eminent in all the provinces in varying stages of success as measured by the amount of playing. British Columbia is a shining example of what can be attained through organization in the schools, there being a number of over 1,000 school teams in that province, exceeding the total for the rest of the Dominion.

The game is controlled amongst the Seniors (adults) in many parts of the Province of Saskatchewan, within registered and unregistered organizations and leagues in many cases so far removed from any authoritative body as to create a great incentive to the gaining of public support.

The following information received from the Saskatchewan representative, Mr. Alan Morrison, attached to the Dominion Football Association (1926), one feels considerable doubt existing in school football in the western provinces as the following demonstrates:

Winnipeg, football in all the public schools, for the season 1926, played under the supervision of the school board officials: Regina, one Junior League, 6 teams; Moose Jaw, one Junior League, 6 teams; Prince Albert, one League, 10 teams; Saskatoon, two leagues, 8 teams; and, thirty other leagues in other centres, playing all under the supervision of the school authorities.

British Columbia has 1,054 teams with an average of fifteen players each, grouped in junior and school leagues. In Vancouver Island greater interest is taken in the game in the schools and steps are being taken during the coming season to get all the schools in line.

To return to Saskatchewan and the splendid organization developed for the 1931 season. Almost every town and village has a playing ground and there need be no difficulty to fit the game of soccer so as not to clash with the regular work of games already in the district.

A six appeal through the sporting columns of the Press and by circulars should be made to all principals and assistant masters to foster the game of soccer in the interest of amateur sport, emphasizing the team work required to attain efficiency and the moral benefit to the school team and individuals, physically and morally.

In towns and village schools there may be an insufficient enrolment of boys to make up the required senior teams. These in turn could organize with two or more, forgetting school and form a school league: (a) a midget league for pupils up to 7, and (b) a playing league for all grades over 7, including high school pupils. It would be a great mistake to lay down too hard and fast rules in the initial stages of the organization as over-organization would need to be so elastic as to permit of two or more rural schools entering as a composite school team. This organization is necessary to take care of instances where Winnipeg may be the playing age is below the required number. This is commonly the case.

Challenge shields can be purchased for the moderate sum of $25.00 or less as well known houses, and medals suitably engraved for presentation to the members of winning teams can be purchased for a trifling figure. Such would be a great incentive to the boys, and the trophy a source of pride to the school entering the successful team in a competition of this nature, even in these difficult times, it should not be hard to raise the small amount locally to purchase the local trophy.

If the local leagues programme as outlined can be developed it would be a come advisable, later, to create a unit of large size, so as to arrange in the province into conveniently sized areas with the end in view of staging a provincial-wide "knock-out" cup competition. It is here suggested the school inspectorate areas be the basis of these units. It may be stated, however, that it would be best to get a keener body of sportsmen in the Province, in the way of work, than our school inspector, and a special effort would be made to enlist their active service in developing amateur sport along these lines. If this can be accomplished it should be possible to arrange for the semi-finals and finals of the competition to be fought out at the provincial cairs before harvest.

In closing on this subject it must be borne in mind that any programme for rural games must be run off between seed-time and harvest, i.e. May 15 to August 15, as after the latter date most boys are engaged in harvesting of the crop until freeze-up.

To obtain a suitable trophy for the provincial schools football competition, an appeal could be made to some public spirited citizens and as regards obtaining funds to operate the campaign, an appeal should be made to the Saskatchewan Athletic Commission, the Dominion Football Association, and the Football Associations in Great Britain.

To wage a successful and continuous campaign the writer is of the opinion a sum of five thousand dollars would be required.

In furtherance of the scheme outlined and following closely on the

LLOYD GEORGE AT HOME

This interesting photograph is the latest of David Lloyd George, famous leader of Britain's Liberal party and prime minister and first lord of the treasury from 1916 to 1922, as he appeared on the veranda of his home at Churt; with Mrs. Lloyd George, their daughter, Megan, and two of the noted statesman's favorite dogs. Lloyd George was 68 years old last January.

Press campaign, active organizers—and doubtless with ability as demonstrators in words and footwork — should be engaged to follow up on the towns and villages as described.

The Province of Saskatchewan Football Association is desirous of expressing its appreciation of the assistance rendered by the Department of Education in supplying a large scale map of Saskatchewan with all inspectorate Areas outlined thereon.

Since outlining the campaign it has become apparent that owing to the existing financial stringency it will be impossible to obtain any grants from the Government during the current year.

It is hoped, however, that wherever possible local efforts will be made to organize school teams and leagues. Wherever this is done please notify the writer of this article, and an effort will be made later to pick up and co-ordinate these efforts. It is recognized that so soon as a nucleus of school teams and league has been formed that a subsidiary school Football Association will be necessary to further the particular interests of the game in the schools of the province.

Any help given in the game's promotion may obtain on application one of the coaches working in the area, also one rule book issued by the S. F. A. for the sum of 50c. from O. J. Hopkins, Anerley P.O., Sask.

Pays After Eight Years

New York Man Redeems Business Card As Promised

A business card sealed in a bottle and thrown into the ocean nearly eight years ago, has come back home to Frank E. Bridges, president of the National Bank of Liberty, in Liberty, New York. Returning from a trip to Bermuda on March 23, 1925, Mr. Bridges took one of his business cards, placed it in an empty bottle, and cast it through a port-hole. He had forgotten all about the incident until a letter arrived from a card back from the Azores, from one Antancio do Figfieiredo, of Villa de Santa Maria, one of the Azores group. On the card, Mr. Bridges had written a request that he be sent a return of it, and his check for this amount was forwarded to Anancio.

Acquire Velocity Quickly

Bodies Falling Through Air Move At Rapid Rate

Experiments have proved that the rate per second at which bodies acquire velocity in falling through the air is thirty-two feet. If a ball be started from rest from a tower, at the ending at the rate of thirty-two feet per second at the end of the first second of time, it has dropped sixty-four feet at the end of the next second with a velocity of sixty-four feet, and at the end of the third second at the rate of ninety-six feet per second.

A New Stainless Steel

Stainless steel, as used on cutlery is difficult to work and cannot be used for making other domestic articles. Now, it is said, another form of stainless steel has been discovered which can be used in the place of brass, copper, and chromium-plated metals for such articles as bathroom and door fittings.

Growth Of Saskatchewan

The Regina Leader-Post's Commercial and Resources Review notes that the "population of the province (Saskatchewan), is distributed among eight cities, 80 towns, 375 incorporated villages, and 101 municipalities. In 1905 there were only three cities, 16 towns, 62 incorporated villages and two rural municipalities.

Plans for a train ferry express service from Richborough, England, the "mystery port" of the World war, to continental ports are being considered.

SUNDAY SCHOOL LESSON

APRIL 5

EASTER LESSON.

THE RESURRECTION

Golden Text: "Now hath Christ been raised from the dead, the first-fruits of them that are asleep." — 1 Corinthians 15.20.

Lesson: 1 Corinthians 15.1-8, 50-58.

Explanations and Comments

The Resurrection Of Christ the Most Vital Of All the Doctrines of the Christian Faith, verses 1-4.—Paul reminds his readers, the Corinthians, of his teaching during his work among them, of the gospel, the good news, which they heard from him, on which their faith was grounded, by which they were saved, that is, "in the way of salvation, by faith in the crucified and risen Saviour," if they held fast to the word as he had declared it unto them, and had not believed in vain, "without consideration, and so without stability." "Unless," indeed, your faith was all happy-hazard." In Modern Language, Paul's sentences are usually very involved: the next four verses form one sentence. First of all, as the most important of all the good tidings which I declared unto you, he writes, I told you that which I also had learned (probably from Peter and James, on his visit to Jerusalem recorded in Acts 9.27, 28), that Christ died to atone for our sins, in fulfilment of the Scriptures; that He was buried and was raised on the third day.

"O vanquished grave of Jesus whose chill could not hold Him down upon His heart!
O deep, deep grave of Jesus whose depths can hide a whole world's sin!
O glorious grave of Jesus through whose gloom lies the pathway to Immortal Life!"

—Ralph Connor.

The Evidence For the Resurrection, verses 5-8.—Here follows the strong account of the appearances of the Risen Christ. He appeared to Peter first (as the Twelve (which keeps the symbolical number, though Judas was dead and Thomas was not present at the first appearance); then to more than five hundred brethren (probably on the mountain in Galilee, Matthew 28.16, 17), the greater number of whom are still alive (so you can have their direct testimony, if you will); then He appeared to James (another James (the brother of Jesus, Acts 15.13; Galatians 1.19), then last of all, as to a child untimely born (Matthew 13.11), when Christ appeared to Paul (Acts 9).

The Resurrection Of the Dead, verses 50-58.—Human nature in its habitant of flesh and blood cannot enter the possession of the Kingdom of God; nor does corruption take possession of incorruption. The statement is that such a spiritual body as has been speaking of is absolutely necessary in the Kingdom of God." Behold, I tell you a mystery: some shall not sleep, but we shall all be changed. Thessalonians 4.16; Matthew 24.31; Revelation 11.15), when Christ shall come again, and they will be changed in a moment, in the twinkling of an eye, at the last trumpet-call: and the dead shall be raised incorruptible. And we shall be changed. Hallelujah for the return of Christ during his own lifetime.

When this has taken place, when the corruptible shall have put on incorruption, when the glorious change is received, then will the resurrection triumph over sin and death. They shall be no more, and law shall be no more. Then will the prophecy of Thanks be to God who gives us the victory through our Lord Jesus Christ. Therefore, my brethren, my God! He makes it ours by our Lord Jesus Christ." McFatt's translation.

Wherefore, let us be steadfast, unmovable, persevering in the work of the Lord, for we know that it will not be thrown away.

"Did your father live to a green old age?"

"He died indeed. He was swindled three times after he was seventy years old."

OPEN SORES
HEAL IN QUICKEST TIME KNOWN
"I had sores on my leg for months. Other remedies failed to heal. Then 'Zonite-Salve' healed them in few days." Miss Simard. "Zonite-Salve" heals sores, burns, boils, rash, eczema, itch like magic. All druggists.

To Assist Farmers

Conference Suggested To Deal With Supplying Britain With Canadian Bacon

Two concrete suggestions for assisting the western farmer were made to the government during the debate in the House of Commons.

Stressing the importance of the British bacon market, A. Speakman, United Farmer member for Red Deer, Alberta, asked the government to call a conference between packers and producers of hogs to evolve means for supplying this market regularly. The British dealer, asserted Mr. Speakman, was glad to have Canadian bacon, but he refused to advertise it extensively is Great Britain unless he was sure that he would be able to supply the demand. A great many western farmers had been driven into the hog-raising business, Mr. Speakman informed the House, and the need for a market was urgent.

Another suggestion, also coming from Mr. Speakman, was that the government establish an experimental processing plant for turning the hog into the finished product. Declaring that the spread between the prices paid to the farmer and that charged to the bacon consumer was tremendous, Mr. Speakman informed the House that Danish bacon was now displacing Alberta bacon in the markets of that province. The reason, he contended, was that the tremendous spread between Canadian hog and finished product. The Danish bacon could be produced more cheaply than the Canadian.

Want Work Resumed

Resumption Of Work On Branch Line From North Battleford To Edmonton Is Requested

Enquiries have been instituted between the Department of Railways and the Canadian National with a view to resuming work on the branch line from North Battleford, Sask. to Edmonton, Alberta, according to a reply given in the House of Commons by Hon. H. A. Mackay, Minister of Railways, to a question asked by C. R. McIntosh (Lib., North Battleford). The Minister informed the House that he had received telegrams complaining of the discontinuance of this work. Decreased earnings were assigned by the railways as the reason for stopping operations on this branch line.

A Dangerous Education

There is danger in having a form of education that develops the brain and starves the soul. What sort of education takes as its premises the fact that things as they exist are wrong; it pulls away from the moorings that were good enough for our parents and grandparents and seeks mental excursions into strange channels and on dreams where the signs of direction are not definitely fixed.

The Yukon territory, famed for its gold rushes, now produces considerably more silver than gold.

An outboard motor that runs under the water is a new type of engine for motorboats.

Raw silk production in Japan is again increasing.

Make Your Windolite Pay
Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock
WINDOLITE
THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS
This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.
CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE
USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.
Canadian breeders of poultry and livest ock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 35 inches wide only.
Distributors: JOHN A. CHANTLER & CO., LTD.
51 Wellington St. W. - - - TORONTO, ONT.

Argentina Presents Case Of Exporting Nations At Rome Wheat Conference

Rome, Italy.—With blunt frankness, Argentina, in today's world wheat conference, took the lead for the overseas wheat-exporting countries. The case for Argentina, as stated by Dr. Perez, that country's Ambassador in Rome, may be summed up as:

(1) Institution of preferential tariffs favoring Balkan against overseas wheat would be regarded by Argentina as an inverted export premium and a flagrant violation of the most-favored nation treaties Argentina would not approve even a "timid attempt" at such a system.

(2) Purchasing of Soviet wheat by the absorbing countries of Europe can only accentuate the gravity of the agricultural crisis.

Dr. Perez was preceded by Professor Kritzman, chief Soviet delegate, who lifted the veil over Russia only slightly. Professor Kritzman revealed that, compared with the pre-war figure, the Russian production of wheat had increased 30 per cent., of rye, 20 per cent. while the population of the country had increased by 16 per cent.

Like Argentina, Soviet Russia opposed preferential tariffs in favor of Balkan wheat. Kritzman insisted the great majority of labor in Russia was of a free nature. There was no unemployment and no crisis, he argued, and the people were, for the most part, satisfied.

Internal market of the Soviet for farm produce was increasing, said Dr. Kritzman. Developing of industry demanded development of agriculture. Russia, however, its delegate observed significantly, was willing to consider any reasonable proposal.

Rumania, through M. Madgeru, Minister of Agriculture, spoke with the "voice of suffering." Fallen prices for agricultural products were leading to her ruin. M. Madgeru sought to show that the overseas countries were responsible for the great world surplus.

But this was an attitude which Argentina rejected from the outset. Dr. Perez enumerated the heavy tariff increases brought into effect by Germany and France in their campaigns for the protection of home-grown wheat, and asked:

"Is it possible to imagine a more formidable system of stimulating home production than by making the importing countries less dependent upon overseas wheat?"

The result was the Argentina delegate, was not due to over-production by the overseas countries. It was a legacy from the war.

It was revealed today, by the International Institute of Agriculture, that, in the Ukraine alone, the Soviet had increased the amount of wheat sown by 60 per cent. as compared with last year.

Death Of Arnold Bennett

Famous Author Passes Away After Brief Illness

London, England.—Enoch Arnold Bennett, one of the greatest literary figures of the present century, died here at the age of 63.

Stricken with influenza seven weeks ago, the famous novelist and playwright was recovering when he contracted typhoid fever. After hours of unconsciousness he died yesterday after a blood transfusion had resulted in only temporary relief.

News of the death of Bennett, who wrote some 30 books and more than a dozen plays, though not unexpected, came as a shock to his personal friends as well as to hundreds of thousands throughout the English-speaking world who were familiar with his works.

To Tax Value On Gasoline

Ottawa, Ont.—Values for duty purposes have been fixed by Hon. E. B. Rycklman, Minister of National Revenue, on refined gasoline entering Canada from the United States. In a bulletin issued recently to customs and excise officers, values for import purposes were placed on gasoline from various refining areas across the border. These regulations come into effect immediately.

Followed Nurse Cavell

Brussels, Belgium.—It was belatedly learned here that Miss Anne Scott-James, 56, who gained fame as a nurse in the Great War, died June 23. Miss Scott-James accompanied the remains of the English nurse, Edith Cavell, shot as a spy by the Germans during the War. Following Miss Cavell's execution, she assisted Allied soldiers to cross the Dutch frontier.

Rioting in Madrid

Madrid, Spain.—Flying the red flag of the rebellion, students clashed with police at the San Carlos medical school, resulting in the death of two persons and serious injury to 14. Disorders had their origin in the refusal of authorities to allow the students to parade in behalf of amnesty for political prisoners.

May Increase Postal Rates On Newspapers

To Help Lower Deficit Of Post Office Department

Ottawa, Ont.—Voicing a protest against the projected increase of postal charges on second class mail matter, a delegation of over 20 members of the Canadian National Newspapers and Periodicals Association conference here with Hon. Arthur Sauve, postmaster-general.

The government has had before it for some time the proposal to increase the mail rates on second class mail matter, under which category are included newspapers and periodicals. For the current fiscal year the deficit of the post office department will literally run between five and six million dollars, and the proposal to raise the rate on newspapers has been advanced in an effort to overcome some of that deficit.

Must Serve Sentence

Sixteen-Year-Old Farm Boy Fails In Appeal To Higher Court

Toronto, Ont.—Robert Kitowski, 16-year-old farm boy, must serve his sentence of six months at the Kingston Mountain penitentiary and receive 20 lashes as imposed by Magistrate Cruise for the robbing and robbing of the Dominion Bank at Fort Frances, on February 11 last. This was the decision of the First Appellate Court of Ontario, at Osgoode Hall, Toronto, following an earnest plea for "a more humane punishment" from A. A. MacDonald, counsel for the young prisoner.

Youthfulness of the prisoner which brought forth a "popular clamor" following the sentence, did not appeal to the first divisional court, the chief justice, Sir William Mulock, declared in announcing their judgment.

But this was an attitude which Argentina rejected from the outset. Dr. Perez enumerated the heavy tariff increases brought into effect by Germany and France in their campaigns for the protection of home-grown wheat, and asked:

"Is it possible to imagine a more formidable system of stimulating home production than by making the importing countries less dependent upon overseas wheat?"

The result was the Argentina delegate, was not due to over-production by the overseas countries. It was a legacy from the war.

It was revealed today, by the International Institute of Agriculture, that, in the Ukraine alone, the Soviet had increased the amount of wheat sown by 60 per cent. as compared with last year.

Drill For Oil

Winnipeg, Man.—It is understood here that an oil company, name not known, will expend $250,000 in testing property in the town of St. Boniface, adjoining Winnipeg, to ascertain if oil exists in the district. It was reported that a 60-day option has been taken by St. Boniface council on a block of 14 acres at a price of $2,000 an acre.

The Millionth Ford

East Windsor, Ont.—The one millionth Ford car manufactured in Canada came off the assembly line recently at East Windsor plant of the Ford Motor Company of Canada, Limited. The event, which was hailed as a new milestone in the progress of Canadian industry, was witnessed only by officials of the company and veteran employees.

Sowing Less Wheat

Washington, D.C.—Farmers of the United States reported to the department of agriculture as intending to plant this year 4.9 per cent more acreage of corn, 23.9 per cent. more acreage of oats, 5.5 per cent. less acreage of other spring wheat than was grown for harvest last year.

Will Entertain Governor-General

Ottawa, Ont.—Canada's new governor-general—the Earl of Willingborough—will be the guest of honor on April 8, at a dinner tendered by Premier R. B. Bennett. Members of the cabinet and the leader of the opposition, and members of the privy council will attend the function.

No Samples Yet

Edmonton, Alberta.—"Not a single flake of platinum has been received from the Yukon," declared Hon. W. J. A. Allan, head of the department of geology at the University of Alberta, when asked regarding reports of a strike at Odell, on the C.N.R., west of Edson.

No Change In Construction Program

Prince Albert, Sask.—There will be no change in the $2,000,000 construction plans of the Canadian Pacific Railway in northern Saskatchewan, it was emphatically declared here by D. C. Coleman, Winnipeg, vice-president western lines, Canadian Pacific Railway.

No Aid For Germany

Paris, France.—Denunciation of the commercial treaty with Germany and a decision to abstain from all financial aid constitutes the possible policy of France, Chamber of Deputy is told by persists in carrying out an economic pact with Austria, the Associated Press was informed in official quarters.

Less Unemployed

London, England.—The number of unemployed persons in Great Britain on March 16, was announced by the government recently, as 2,639,533, a decrease of 52,104 under the previous month. The total figure is 1,017,875, more than at the same time last year.

Disorders In India

Cawnpore Troops Shoot Down 30 Rioting Nationalists

Karachi, India.—Turmoil broke out again in India as Mahatma Gandhi, here for the Nationalist congress meeting, was jeered by Communists, and troops at Cawnpore shot down at least 30 rioting Nationalists.

The disorders grew out of the execution last week of three Indians convicted of the murder of a 21-year-old police official in 1928. Gandhi was taken off a train 12 miles outside of the town, but the thousands gathered here for the congress meeting spotted him as he rode into town in an automobile.

A group of 30 or more, known to be of Communist leaning, made for him with jeers and one even, made as though to attack the frail little man with a flag staff. Some carried banners with a gruesome mess of mud and blood.

"Here is the blood of our brothers who were murdered," they cried, refusing to let three cordons of police clear a path for Gandhi's car.

Gandhi's men drove off the assailants, and there were cheers for Mahatma.

The day at Cawnpore was even more serious. Rioting began during the night when Moslem shop-keepers refused to close their stores under a general strike order by the congress men. Troops came out when the fighting got serious, and before the week was over, 30 had been killed, and at least 100 injured.

This trouble too, grew out of the executions.

SIR JOSIAH STAMP APPOINTED HEAD OF GRAIN INQUIRY

Ottawa, Ont.—One of Britain's leading economic experts, Sir Josiah Stamp, was recently named as head of the royal commission to inquire into grading in Canada, it was announced to the first divisional court, the chief justice, Sir William Mulock, declared in announcing their judgment.

It was known that the British economist had been invited to represent the Dominion Government, and the recent announcement carried the first intimation that he had accepted the post. The royal commission is to consist of three members, one of whom will represent the Grain Exchange and another is to be chosen by the prairie provinces to represent the farmers.

Rumors have associated the name of Premier J. E. Brownlee with the position of grain growers' representative, but Mr. Brownlee has declared he would accept the post.

Sir Josiah Stamp has for many years been regarded as an outstanding expert in financial matters. He has had a distinguished academic career and has frequently represented the British Government on financial commissions. In 1918 he was member of the British royal commission on income tax, in 1924 he was member of the committee on taxes and national debt, and in the same year was British representative on the Dawes reparation commission. His most recent task has been to seek means of accomplishing economic co-ordination of railroads.

Appointment of the royal commission has followed expressions of opinion in Western Canada that grading in grain futures is detrimental to the best interests of the producers.

Indications are that work of the commission will be confined to an investigation of this subject, although it appears possible the scope of the inquiry may be extended to include whole questions of marketing of the wheat crop.

A church just constructed at Dortmund, in Germany, has a concrete framework and walls of glass of different colors.

SOUTH AFRICAN GOVERNOR

Earl of Clarendon, newly appointed governor-general of South Africa, as seen in his official uniform. Lord Hyde, the Earl of Clarendon, was a fruit farmer, near Pickering, Ont., in 1912, when both he and Lady Hyde lived in an ordinary farm house.—Copyright by Acme Newspictures.

Express Train Leaves Track

One Life Lost and Fifteen Injured In Wreck Near Swift Current

Winnipeg, Man.—Swift travelling Canadian Pacific Railway passenger train No. 3, westbound, hit a broken rail near Swift Current, Sask., and five cars, including four sleepers, plunged from the rails, down a 15-foot embankment.

There was one fatality—a 67-year-old Cleveland man, Manning F. Fisher, who with his family was en route to Vancouver from where he was to have sailed for China on a holiday. His death was attributed to shock. He died shortly after the derailment. Mrs. Fisher and a 22-year-old son escaped injury.

Thirteen other passengers occupants of dining-car members of the dining car staff, were cut and bruised when thrown from their berths. All escaped serious injury.

Regina Winter Fair

Three Grand Champions and Reserve Champion Stallions Are Named

Regina, Sask.—Three grand champion stallions were named at the Regina Winter Fair. These were: Clydesdales, "Lochinvar," owned by Sharpe Bros., Lumsden; Shire, Hall-Percheron, "Colmar," owned by C. M. Rear, of Regina, Sask.; Belgians, "Vitali," owned by C. M. Rear.

The reserve championship in Clydesdale stallions went to H. Black, of Belle Plaine, with "Carbine Footprint"; in Percherons, to C. M. Rear, with "Rainy River Charles"; and in Belgians, to R. Thomas, of Grandora, with "Paragon Bill."

R. Thomas was adjudged to have the best gelding in the show with a Clydesdale. He showed that accomplishment in the same ring.

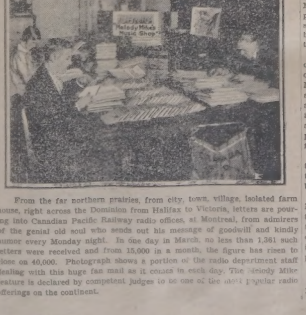
Well-To-Do Farmers

Toronto, Ont.—The well-to-do middle class farmer had by no means disappeared. Hon. Duncan Marshall, former Minister of Agriculture for Alberta, told a meeting of advertisers and salesmen here when discussing farming conditions in western Canada. He believed that present day difficulties would be overcome by the farmers. Generous loans to farmers by bankers at low rates of interest were a necessity, however, he said.

Temperance Forces Defeated

London, England.—Rallying after their recent defeat in attempting to introduce prohibition into Great Britain by act of Parliament, the temperance forces sought to curtail liquor advertising which flares over towns and country throughout the isles, but the House of Commons rejected the move by a vote of 127 to 112.

MELODY MIKE FAN MAIL



From the far northern prairies, from city, town, village, isolated farm house, right across the Dominion from Halifax to Victoria, letters are pouring into Canadian Pacific Railway radio offices, at Montreal, from admirers of the genial old soul who sends out his message of goodwill and kindly humor every Monday night. In one day in March, no less than 1,361 such letters were received and from 15,000 in a month, the figure has risen to close on 40,000. Photograph shows a portion of the radio department staff dealing with this huge fan mail as it comes in each day. The "Melody Mike" feature is declared by competent judges to be one of the most popular radio offerings on the continent.

Tourist Traffic Slightly Less

But Figures For 1930 Place Value At $280,000,000

Ottawa, Ont.—Despite falling off from 1929 tourist traffic still remains a decidedly prolific source of income in Canada. Figures for 1930, estimated by the Dominion Bureau of Statistics, place the value of tourist traffic at $280,000,000. This substantial figure, in the face of far-flung economic depression, was only $28,-000,000 less than 1929.

Automobile tourists from the United States increased in numbers, but apparently did not spend as much money. The estimated expenditure was $202,409,000 as compared with $213,577,000 in 1929. The number reached by the mathematicians at the Bureau of Statistics is that the relative changes of a motor party. Canadian highways had appeal for those who in more prosperous times might have been inquisitive about the beauty of Canada. Entries of cars from the United States numbered 5,-400,000 as against 4,868,000.

Canadian tourists spent also were watching their pocketbooks. Automobiles carried tourists to the United States who parted with $83,448,000, according to the estimate. This compared with $3,655,000 in the previous year. Total expenditures abroad of all Canadians is placed at $112,000,000 as against $102,000,000 in the year of booming stock quotations.

Would Repeal Dry Law

Illinois Senate Passes Bill Repealing Enforcement

Springfield, Ill.—The Illinois Senate recently passed a bill repealing the state's prohibition enforcement laws. The measure, already passed by the House, now goes to the governor. The vote was 30 to 24.

The bill would repeal the state prohibition law under the Search and Seizure Act. It would not, however, draw all state support from the Federal Government in fighting illicit manufacture and traffic in intoxicating liquor.

MANITOBA POOL ELEVATOR PROBE IS UNDER WAY

Winnipeg, Man.—Surrounded by prominent counsel, including T. J. Murray, K.C., authority on the legal aspects of grading and handling of grain, K. Williams, K.C., commenced a royal commission investigation into the operations of the Manitoba Pool Elevators Limited.

Procedure to be adopted in presentation of evidence by counsel assisting Commissioner Williams gave a compromise ruling which will permit Pool counsel to present documentary evidence, and, in support of their defence of company officers in explanation of financial reports submitted.

It had been the intention of Mr. Murray and his associate counsel, Travers Sweatman, K.C., to present oral testimony on each document submitted, but he was objected to by A. B. Hudson, K.C., representing James R. Murray, Winnipeg grain authority, whose charges made to Premier John Bracken brought about the appointment of the commissioner.

Under the compromise ruling, agreed to by all counsel, grain elevators will file documents, and opposing counsel will be permitted immediate cross-examination of witnesses on them. The same ruling will apply when witnesses for Mr. Murray testify on the filing of documentary evidence.

Mr. Murray, who charged extravagance in the operation of pool elevators, and grading to the detriment of the farmer shareholders, was in attendance at the sessions.

In the country there are 11,000 farmer shareholders, operating 150 country elevators, who are vitally interested in the probe, which is expected to last at least three weeks.

Both sides made clear that "a complete picture" of the pool elevators operations must be presented.

Mr. Murray, counsel retained for the pool, feared it was the intention of Mr. Hudson to call officers and employees of the elevators, in order to substiate the charges, and not to bring out the complete facts relevant to the whole case.

A wrong impression might be created with the examination of only one document or witness, said Mr. Murray. Incomplete examination might at least cause suspicion, and with keen rivalry existing between pool and non-pool elevator agents, lead to the establishment of propaganda calculated to break the confidence of shareholders.

"Confidence of shareholders is the life blood of the Pool Elevators Limited," he said. "It must be maintained."

J. T. Thorson, K.C., associated with Mr. Hudson, declared it was not intended to create any unnecessary disturbance in the minds of shareholders. Everything must be presented in detail, not summaries, and not piecemeal.

Sports will be featured at this year's fair at Cologne, Germany.

Political Leaders In Quebec Federal Politics Heard In Lively Debate

Death Of Timothy Healy

Irish Nationalist Statesman Dies In Dublin, Ireland

Dublin, Irish Free State.—Timothy Michael Healy, over whose bitter-sweet sallies in the House of Commons old-timers still chuckle, died, March 26, 1931, at the age of 75.

He was the first governor of the Irish Free State, but he will be remembered longer as one of the most brilliant parliamentary speakers who ever galvanized the House of Commons into action.

In the old days before the Free State had its own parliament, he used to sit in his corner of the House, his face flushed down over his collar, apparently not to listen. Then he would get up to his feet and begin one of those characteristic speeches in which the vitriol of his sarcasm was overlaid with the honey of his native brogue.

He had been sick for weeks, and those close to him knew the end was near, but his death, nevertheless, was a shock to those who knew him.

Man Without a Country

Department Of Immigration Decides To Admit Radunski To Canada

Ottawa, Ont.—John Radunski, referred to as the man without a country, will be admitted to Canada, the Department of Immigration has decided. When he was stopped at the Detroit-Windsor border some weeks ago, his case excited considerable public comment because, not only did the United States refuse him entry, but so did Canada. The latter admitting him to enter this country went forward recently.

Radunski came to Canada in 1914. In 1923 he went to United States, where he married an American woman. They had two children. Then after his wife's death, Radunski sent to Canada to the home of his parents. It was when he sought to follow them back to this country that he was stopped by immigration authorities.

Imperial Airways Starts New Service

Five Important Railways Are Participating In Scheme

New York.—New high speed air-rail service was inaugurated by Imperial Airways, Ltd., of Great Britain, on April 1.

Five important railways in Great Britain, the Great Western, London and Northwestern, London-Midland and Southern, the Southern and Southern and, it was announced, is receiving urgent freight at 140 stations.

Mail will go by fast trains to London and by trucks to Croydon Airdrome for dispatch throughout Europe, Egypt, Iraq, India, and Central Africa.

Two agent said plans are being formed for through service in Europe, Asia, Africa and North America.

Speech Heard

Mr. Agent said plans are being formed for through service in Europe, Asia, Africa and North America.

Child Has Narrow Escape

Welland, Ont.—A 45 calibre bullet fired up in the air by an unknown hunter, dropped through the roof of a house occupied by Mr. and Mrs. Floryan Oberyk, pierced the bedroom ceiling and landed in the bassinet of the baby's crib. The bullet missed the child by inches.

Speech Years Among Lepers

Honolulu.—Ira Dutton (Brother Joseph), Trappist monk, who is known for his work among the lepers of Molokai Island, Hawaii, died here after a long illness. He was 57 years old and had spent nearly 45 years among the isolated lepers.

Ottawa, Ont.—Political leaders in Quebec Federal politics swung into action on the House of Commons in continued debate on the address in reply to the Speech from the Throne. Arthur Sauve, postmaster-general, and Hon. Ernest Lapointe, former minister of justice, expressed divergent views.

Mr. Sauve spoke first. It was his initial speech in the House of Commons and his reception, especially when he spoke at some length in English, was hearty. He defended the government, reviewed what had been done to aid the unemployed and assist the farmer, and asked for co-operation of all parties to make the coming economic conference a success. He hoped and trust, in announcing the action of the government in respect to Russia, the leader of the opposition was actually denouncing the government.

Hon. Ernest Lapointe, veteran of 24 years in parliament, found in the Sauve speech "considerable reason for criticism of the government. Mr. Lapointe, who has himself represented Canada at international conferences, censured Premier R. B. Bennett for the unmessy spirit which he had manifested and blame him in his negotiations.

"The British Commonwealth is an idea; it is a soul," asserted Mr. Lapointe. "To look at it from economy foundation is to court disaster. The tie of sentiment is this, that it is strong. It may seem weak, it may be invisible to those who cannot see anything outside of the material, but that is more powerful than the best to which it has always been put in periods of trouble and difficulty."

Mr. Lapointe had criticism for Mr. Bennett in the ground of interference in British domestic affairs.

"To force protection upon Britain, as the prime minister of Canada tried to do, was not only to attempt to inspire on economic fallacy, but it was interfering in the most direct way with the domestic policy of the United Kingdom," charged the former minister of justice.

Miss Agnes MacPhail, Progressive member for Southeast Grey, and the only woman member of the House of Commons, followed Mr. Lapointe.

In his speech Miss MacPhail had made direct reference to Miss MacPhail. He said that the arguments advanced by her in speeches had been of such a subtle character as to induce me to excuse her for the stand she has taken toward resolutions put by the province of Quebec for the granting of the franchise to women.

"The fact," added Mr. Sauve, "I am coming more and more to an acceptance of the idea of the granting of this franchise."

To Dispose Of Wheat

Senator Borah Would Donate Surplus Wheat to United States To China

Washington, D.C.—Old suggestion that the surplus wheat held by the National Grain Stabilization Corporation, amounting to over 200,000,000 bushels, should be turned over to China, was made by Senator William E. Borah.

Such action would require an act of congress, and help to the corporation has been bought and paid for, and the policy of the Farm Board is that it shall not be given away.

Borah's idea was that a gift of the wheat to China would create an appetite for wheat bread among the 400,000,000 Chinese which would result in largely increasing the market for wheat in that country.

Establishment Of A Permanent Canadian Marketing Board Urged

Winnipeg, Man.—Establishment of a permanent Canadian marketing board was urged in the Manitoba legislature by Hon. R. A. Hoey, minister of education. Answering criticism of wheat pool operations, Mr. Hoey contended that a permanent marketing board would have a vital and direct relationship to the recovery of agriculture in the west.

He also proposed, in speaking on the second reading debate on rattification of government pool loan guarantees that quality production should be insisted on and that products should be standardized from coast to coast.

Cash payment to the banks for the government's guarantee of the Manitoba Wheat Pool's indebtedness was urged by W. Sanford Evans (Ind. Con.), Winnipeg. He advised the government to float a $5,000,000 bond issue and pay the banks in cash rather than to seek to carry the overdraft over a period of years.

Under such a plan, believed Mr. Evans, the pools would get a new start and would profit by their lessons of the past, after the policy of speculating in futures, which, he contended, had been the pools' undoing. Most severe threats in the world market at present, he commented, lay in the grain to be released from the United States following the farm board's decision to end its stabilization policy.

Mr. Hoey, minister of education, replied specifically to Mr. Bennett statements, reviewing the formation of the pools and quoting Premier R. B. Bennett as saying, at Regina, that the pools had followed the wisest policy under the circumstances. Incoming to the government for the first time during a period of severe adversity, said Mr. Hoey, farmers were doing only what had been done with extraordinary success by many other interests.

Annals Of The North

Inexorable Demands Of the Arctic Upon Lives Of Eskimos

The inexorable demands of the Arctic upon the lives of those aborigines whose day to day existences is beset with perils totally unknown to Christian generality are once more set forth in the annual report of the Royal Canadian Mounted Police.

Kahluk, a Nogamiut Eskimo on Adelaide Peninsula, "afforded an example of the co-existence of old customs and the new white man's law," records W. Gibson, a Hudson's Bay Company inspector in that remote region. In addition to the industries of his age, Kahluk, was suffering from so cold and bronchitis.

As his strength was failing, he besought his sons to kill him. They came to me and mentioned this," Mr. Gibson continues. "I, of course, forbade them and took measures to see they did not carry out his wishes."

Seven days later, one of Kahluk's sons, Mangiq, reported the old man had died. Examining the body, Mr. Gibson found no traces of strangulation or other foul play, although it was rumored Kahluk's family had killed their father in this fashion. Mr. Gibson says on this point:

"When the natives heard of the death they expected that his sons had murdered him by strangling, which is a native custom.

In another case of hopeless illness, Mahaghah, a 56-year-old Eskimo, at Cambridge Bay, broke his neck's spine and hips, and consequently unable to hunt seals or caribou, hanged himself. Mahaghah, despondent and weary of living, induced his wife, Kaisyuk, to attach a string to a hook, arranged for the use of their igloo. He then crawled with difficulty to a snow bench and making a noose in the string, got it around his neck and hung his head therein until death occurred.

The suicide was carried out in the presence of a native audience who remonstrated with the crippled Eskimo, but made no effort actually to prevent him.

A two-year-old tragedy near the Hudson's Bay Company post at Cape Dorset comes to light in the current report. A party of Eskimos proceeded inland to hunt for game, but results were disappointing. All but Avalinerdiuk, his wife, and three children returned to Cape Dorset. Months passed, with no word heard of them. A year ago the bodies of the children were found.

Tunidlee and Inoochask, two natives who made the discovery, declared the children's bodies were in a tent, lying face down on a bed of deerskins and frozen to the ground. They had died of starvation. Of the father and his wife no report was ever heard.

Has Met Million Trains

But St. Louis Station Porter Has Never Been Robbed On One

Joe Banks, a porter at the Union Station, St. Louis, Missouri, has met 2,113,000 trains during his sixteen years of service. He has never ridden on one.

He explains it this way: "I've seen so many that they don't seem to interest me any more. But there is something about carrying grips that keeps you at it. I guess it is because every load is different. And you meet so many interesting people."

Joe has carried baggage for five Presidents.

When asked the largest tip he had ever received, he replied: "Ten dollars. That was a tip I got in 1914 from the Kentucky Derby at Louisville, where he had won a lot of money on Black Gold."

Canada's Water Areas

The exceeding complexity of the water areas of great portions of the Canadian Shield may be seen on the Lac la Ronge, Saskatchewan, sheet of the National Topographic Survey, Department of the Interior. In this map sheet, which covers an area of 5,400 square miles, shows more than 3,000 separate lakes and 1,000 islands.

The Warning Whistle

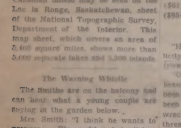
The Smiths are on the balcony and can hear what a young couple are saying in the garden below.

Mrs. Smith: "I think he wants to propose. We ought not to listen. Whistle to him."

Mr. Smith: "Why should I? Nobody whistled to warn me."

Tom—I want a wife who is good, clever and economical.

Dick—My dear fellow, you don't want one—you want three!



"This novel has an awful ending."

"How is that?"

"It ends with a wedding."—Boston Transcript.

Animals Respond To Changes

Like Land On Which They Live They Are Never Still

The restriction of the ranges of wild animals occasioned by the advance of civilization is now attracting so much notice that most of us think of it as a process universally the same process is going on without human interference, and how much more destructive to particular forms of life is nature than man, writes Mr. Gerrit Miller. Parts of the Sahara were once wooded, with the drying up of the country most of the animals which inhabited them must have perished . . . spreading of forests over grassy steppes has undoubtedly been responsible for the disappearance of many more mammals than have ever been exterminated by man. On the other hand we have recently learned that the opposite process is actively going on; that to that some mammals are now extending their ranges. In the northeastern United States cottontail rabbits are moving northward and westward, despite all of organized campaigns for their extermination, are spreading forward the north in Canada and Alaska, and possibly toward the west in the United States; even the slow armadillo has pushed the limits of his territory northward across the State of Texas during the memory of men now living. All of this shows that the species of mammals, like the lands on which they live, are never still. Life moves about on the surface of the earth in just the same way that this surface is moved—gradually and unnoticed—by wind, water, and ice.

Always Plenty To Do

Woman Who Keeps House Never Out Of Employment

There is one profession where there is no unemployment. It is woman's world. There's always plenty to do in the home. The home woman always has known how to keep busy and to do. Now at last, the rest of the world can be, and is told, in figures just published by the United States Department of Agriculture. Dr. Louise Stanley, of the bureau of home economics, says that a husband and family spends ten and one-fourth hours a week preparing meals, works forty-nine and one-fourth hours every week in performing tasks about the home. And, as we have been told many times before by our wives and mothers of every generation, "women's work is never done."

Now, Dr. Stanley's carefully prepared government statistics set forth that the average United States city man spends one hour and forty minutes and family spends ten and one-fourth hours a week preparing meals, works forty-nine and one-fourth hours every week in performing tasks about the home. And, as we have been told many times before by our wives and mothers of every generation, "women's work is never done."

Story With a Moral

Better To Help Undeserving Than Turn Needy Away

The following editorial recently appeared in the Buffalo Courier Express:—Every tale should have a moral. Here is a tale and it has a moral.

He was rather a good looking fellow. That is, he was neat and he was reasonably clean. He did bear the marks of one who was down, but it was evident he was not out. There were signs that he was having plenty of hard knocks. Also that they were wearing on him. There was beginning to creep into his eyes a cowed look of discouragement. The lines around his mouth were pulling down. He had not seen anything for months, in a long time. He was selling pins or needles, or thread or something, it does not make much difference what, just little things that did not cost people to buy. Going from door to door to do it. It was a poor way of making a living. At the best the sales could not amount to much in the course of even a diligent day. And the profits to even less. But at least it was an attempt. There was a curious hesitancy, however, about the way he approached a house. Not much assurance. Not a bit of it. Rather a bit of fearsomeness as though he dreaded to knock.

It was along about noon that he met the one man on the route he was pursuing for that day. As the door opened, he said: "Would you sure like a boy"—and as he did disclosed his little handful of wares. She would and she did. "And now," she said, business being over, "is you all about hungry time. Won't you come in and have a cup of coffee with me?"

It was as though he had not heard aright. The surprise he felt showed in his eyes, in his expression, in the tremor that made his Adam's apple dwell up on the details of that luncheon. It was simple enough. After all, it was not so much the food that counted—though that was something to the man—as it was the spirit. When it was over he said:

"Ma'am, I'll tell the weeks that I have been trying to earn money in this way to keep my little family together this is the first time I have had this trouble. So often the door is slammed in my face. Sometimes I am called a tramp. Often I am threatened with arrest. My God, they must know! In these days when so many men are without employment they must know! They must know that many like myself have been forced to turn to almost anything to keep a shelter for the little ones and to get bread for them to eat. I've always been straight. I want to keep straight. But it is hard, hard, especially when doors are slammed in your face day after day, and day after day I do hear you called a tramp and a beggar. I feel better now, thank you—thanks to your coffee and —to you."

It's not much of a story, is it — just a threadbare sort of thing, without color, or atmosphere, or any of the other qualities which go to the making of fine fiction. Well, it does not need those things — for it is a true story. And as for the moral — well, that is for you to remember when he, whoever he may be, knocks at your door and asks you to buy.

We once knew a white-haired, sweet-faced woman who said she had never refused a man who asked at her door. "It is better," she explained, "to help many who are undeserving than to turn away one who is in real need."

To Kill Wild Oats

Wild Oats Only Germinate In the Spring and Early Summer

Superintendent W. A. Munro, of the Dominion Experimental Station at Rosthern, Sask., pointing out that wild oats germinate only in spring and early summer under favourable conditions of soil moisture, advises their eradication by letting them germinate and destroying them. He states "As soon as the crop is taken off shallow plough the land or double disk it and as soon as possible in the spring harrow it and leave until wild oat plants show above the ground—from middle to end of May. Plough to a depth of three or four inches sowing barley or oats for green feed. A few wild oats are likely to appear in the crop.

Trees From Canada

The contribution of Canada to reforestation of other countries is important. Fifty-three per cent. of the trees raised from the Dominion last year went to the British Isles; 10 per cent. to New Zealand, and the remaining seven per cent. to Australia and other countries. In the last 10 years the British Forestry Commission has planted 140,000 acres of softwoods in different parts of Great Britain, the greater part of the trees having been grown from Canadian seeds.

Saskatchewan Creamery Butter

Saskatchewan's output of creamery butter in January amounted to 894,187 pounds, which was 200,000 pounds higher than the output for any previous January, and 266,483 pounds, or 76.1 per cent. above the figure for January, 1930.

Lesson Still To Be Taught

People Must Learn To Use Leisure Time In More Efficient Way

"It is just as unreasonable to expect a child to digest a week's food in 15 minutes as it is to expect him to absorb mentality, in 15 minutes, what several decades ago, required a week or ten days," stated Judge Mott, of the Toronto Juvenile Court, before the Samaritan Club. "And that is just what modern life is doing. A boy in modern times is reared under driving stimuli. Fifteen minutes at a picture show gives him the whole story of a book which would take the same boy a week to read.

"The complexity of modern life is some today than at any other time. Hence the difficulty of adjustment. While science, Judge Mott continued, had shortened the working hours of a man, had improved his food and living conditions, and increased his earning power, it had not, as yet, taught him how to efficiently spend his leisure time.

The physical and mental causes of delinquency, the speaker said, could be discovered, but there were other immediate causes. The primal causes were not known yet, and probably would not be known until man learned to use his spare time in a more efficient way.

Judge Mott then touched on education. Education, he said, used to be considered the dumping of information into a child's mind. But that conception has been changed. Education is, really, the unfolding, the giving out of something, or, in other words, self-expression. "Every child has natural urges that seek expression, and if these urges are suppressed the child will seek some abnormal expression. The lack of expression in the home was the cause of this delinquency in a child," Judge Mott stated.

Poor school life touches only the intellectual side of a child's life, and leaves the emotional to be touched by other sources."

Western Insect Pests

Campaign For Control Of Outbreaks Of Western Cutworm

The Entomological Branch of the Federal Department of Agriculture has inaugurated an intensive campaign for the control of outbreaks of the Pale Western Cutworm in Saskatchewan and Alberta in 1931. This pest caused serious losses last year, and under average conditions the losses will be even more serious this year. Attention is also being called to the Red-backed Cutworm infesting gardens and to grasshoppers or "locusts." Poison bran baits are found most effective as a measure of control. If you are in the infested area get in touch with the nearest Dominion Entomological Laboratory for practical assistance in applying effective control measures.

Right-Of-Way

You often win the law-suit
If you had right-of-way,
"The other driver should have stopped"
That's what the jury'll say.

But right-hand, left-hand, up or down,
You're surely out of luck,
When, though you had the right-of-way,
The other had the truck.

A Family Of Millionaires

An estate at present valued at $20,000,000, nearly $5,000,000 of which has been paid to the treasury in death duties, was left by the late Sir George Verdon Proctor Wills, member of the famous British tobacco family. This family, in the last couple of generations, probably furnished more millionaires than any other in England.

In the absence of the governor-general, the direct representative of the King, Rt. Hon. Lyman P. Duff acted as administrator at the opening of the second session of Canada's seventeenth parliament at Ottawa, March 12, when he rode in state to the parliament buildings. Mr. Justice Duff, who is shown above in his official dress, is the first Canadian to enjoy this distinction.—Photograph by John Fowle, Ottawa.

There Was a Time—

When Farming Was Paying Business and Despair Was Unknown

Live hogs have been selling this winter for $7 to$8 per hundred pounds. There was a time when dressed hogs sold for even less money, and the farmers of that time made money, or thought they were making money. They built barns and houses, replaced the cradle and the scythe with reapers and mowers, raised large families, gave employment to many blacksmiths, wagon makers, carpenters, shoemakers, tailors and harness makers. They had large families and gave their sons and daughters a fair start in life. They kept their hogs all summer and let them live on grass. In the fall they got a few turnips, carrots, small potatoes and the waste from the threshing floor. For they threshed peas with horses fifty years ago and often beat out their oats with a flail. There were no autos in those far-off days, few party dresses, for card parties and dancing were sins. There were temperance lodges and paring bees, and churches to attend and the mysteries of life spread their nets as they do now. The schools were filled with happy children. Marriages were multiplied and cemeteries broadened. Life was quite full of labor and pleasure, joy and sorrow, and of hope and fear all it is now. But on many of that day in looking into the ponds of water that gather in the spring could see the phantoms of despair as all men can see it now.

A Good Substitute

Small Gardener Thought Policeman Would Make Fine Roller

There was no gainsaying the fact that F.C. Roberts was an outsize. His feet covered quite a large area when placed together, and they left deep impressions where he trod.

So perhaps the little girl who was spreading sandy gravel over the garden path may be forgiven, for, as the worthy officer passed her gate the second time in five minutes she ran across to him.

"May I ask you something?" she inquired.

"Ask away, missie," beamed the constable and tucked his thumbs into his belt.

"Then would you mind walking up and down my path a bit; it's so uneven and I haven't got a garden roller."

The Personal Factor

The personal factor is one of the most important in the successful feeding of pigs, writes R. M. Hopper, Animal Husbandry expert of the Brandon Experimental Farm. The successful hog feeder realizes that feeding is not merely a mechanical process, but one requiring skill and close observation of his animals, to obtain the maximum development and greatest returns for the feed consumed.

These Modern Inventors

Clever apparatus which when attached to a bed registers when it is entered and left, and whether the occupant has slept quietly, has been patented by a Leipzig inventor. A clockwork affair, electrically controlled, it is intended for hospital use. It is also reported, however, that a control for those who keep late hours or for daughters suspected of stealing out after dark.

The professor was conducting an intelligence test, suddenly he pounced on a student—

"How many make a million?"

"Not many," said the student. He passed.

A seaside villa belonging to the Emperor Nero has been excavated at Anzio, to the south of Rome.

Getting Out a Newspaper

Few Readers Have Any Idea Of What It Involves

Getting out a good newspaper is a fascinating task, but also a difficult one. No other job that comes to mind is quite so taxing, so hurried, or demands greater pains. From the moment a newspaper is started, be it either a daily or a weekly, the work is carried on under pressure, a race against time, and moreover, if an editor's position —could you do it?

Could you, for example, spell correctly, off-hand, the names of a hundred prominent of the residents of the town? If you could do this, could you write their initials correctly without resorting to the city phone directory or other authority?

Could you write down, off-hand, the names of your city officials, your local school board, your county officials, getting all the names, initials and offices correct?

Could you gather the threads of a story from a dozen persons and weave it into an intelligent, readable account the first writing?

Could you write seven columns of material of 1,200 or 1,400 words each in two or three days, week after week, year after year, and then you had finished those seven pound out two or three columns more before press time?

Could you write a heading, could you call to mind in a moment enough synonyms so that you would not repeat the main thought in the same words?

Could you judge in a minimum of time what nine headlines and what position in the paper each should be given to each of the 25,100 or more stories that might go into your paper?

Could you decide in a moment or exercise "snap" judgment on the dozens of questions a newspaper editor must face daily and get a majority of them correct?

We won't tire you—but if you could do these few simple things and a dozen times and one more times as many more ones, you should be a newspaper editor.

The point we wish to make is that one can produce a good newspaper only after continued diligent study and years of practical experience. And we have heard dozens of persons remark that they could turn out a newspaper, and a good one, too, if better fed, than the one they are getting. That is not true unless they have gone through the years of training that a good newspaper demands of its workers.—From the Linotype News.

Develops Food Property

Sprouting Restores Vitamin "C" To Dried Peas and Beans

Dried peas and beans which are endowed with some of the valuable food properties of fresh vegetables by the simple process of sprouting them, recent studies by the Bureau of Home Economics of the U.S. Department of Agriculture have revealed.

Sprouting restores the vitamin "C" to the diet results in scurvy, formerly the dread of sailors on long sea voyages.

Even under less extreme conditions, many persons endanger their health because of an unperceived deficiency of vitamin "C" in their diet. This food deficiency also is thought to be an important cause of tooth decay and of many cases of so-called rheumatism.

Citrus fruits, tomatoes and raw cabbage have been recognized as important sources of vitamin "C" for a number of years, but until recently the food had not been considered as a possible source.

To obtain vitamin "C" source from dried beans and peas the U.S. Bureau of Home Economics experimented with several methods of sprouting. One simple method was simply to roll up a sheet of cheesecloth, sprinkled with dried beans, and keep moist until the sprouts were an inch long. Sprouted seeds, being used in cooked dishes, have a mild flavor and make up into tasty dishes.

Saskatchewan Grain For Chili

A shipment of seed grains and grasses was recently sent from the University of Saskatchewan, Saskatoon, to a buyer in Chili, South America, who wishes to test out some of the improved varieties produced in Canada. The shipment included early oats, spring rye, flax, sweet clover, and western rye grass.

Map Of Winnipeg District

The Topographical Survey, Department of the Interior, has just issued a new map of the Winnipeg district on the scale of one inch to four miles. This map being one of the sheets of the National Topographic map of Canada.

Dusty Ike — "Please, sir, I've a sick wife, can you help me out?"

Business Man—"I can give you a job next week."

Dusty Ike—"Too late! She'll be able to work herself by then."

The biggest bivalved mollusc weigh as much as 200 pounds.

War Debts Hinder Trade

President Beatty Of the C.P.R. Speaks On Present Economic Conditions

"I believe that one of the most deterring influences to the resumption of normal trade in the presence of huge war obligations, repayment of which, and the interest upon them, are reducing the buying power of debtor countries to such an extent as to make trade under present conditions impossible," said E. W. Beatty, K.C., president of the Canadian Pacific Railway, in addressing the Board of Trade and Empire Clubs at Toronto, recently.

"That is not a situation which you or I can settle, or that Canada can settle," he continued, "but unless I am very much mistaken, it will have to be remedied before normal prosperity in certain aspects of our progress will be shown."

Mr. Beatty believed it was the duty of the Federal authorities and Canadian Chamber of Commerce to find out how much of the news emanating from Soviet Russia is propaganda, and how much is real. It seemed inconceivable, he said, that Canada should invest funds on the basis of a friendly competitor "if their ambition is to destroy the political and commercial foundation upon which the country, and all other civilized countries, have been built.

"If this is true, and if the so-called five-year-plan can only succeed with the direct or indirect assistance of other nations of the world, it is reasonably clear that assistance should not be extended from this country; but in the meantime, we should know more than we do, and we should know more than we have done, the possibilities of market extensions in the Orient and India."

"When we become slightly discouraged and perhaps somewhat apprehensive, though not seeing, now and then, indications of a return to prosperity, we can take some comfort in the fact that, as it is reasonably clear, the price of basic commodities was greater in 1930 than in 1925; that our country is just as strong and our people just as resourceful, energetic and just as confident in the main as in recent and commercially more prosperous years," he continued.

He recalled the great panic of 1893-96. In 1894 business was paralyzed over the entire western half of the United States. Canada, however, had gradually come back to culminate in a new tide of prosperity in 1897.

"During all this period, the people of the West never lost heart," he said, "and I think it well to remind ourselves of this fact of financial depression, because you may recognize certain parallels to financial conditions of the past year. The recent depression in Canada has, however, been considerably less in proportion to that of the United States, indicating that this country has grown less dependent than was the case 33 years ago."

To Assist Farmers

Agricultural Products Export Board May Be Established

The proposed establishment of an agricultural products export board for Canada, to handle shipment of all agricultural exports from Canada not covered by the British Columbia Export Board, was discussed at the recent annual meeting of the Canadian Chamber of Commerce by Dr. A. Leon Boreth, general manager of the Canadian Egg Pool. The board will control this portion of financial dispersion, because you may recognize certain parallels to financial conditions of the past year. The recent depression in Canada has, however, been considerably less in proportion to that of the United States, indicating that this country has grown less dependence

WHEN CHILDREN FRET THERE are times when a child is too fretful or feverish to be sung to sleep. There are some pains a mother cannot pat away. But there's quick comfort in Castoria!

For diarrhoea, and other infantile ills, give this pure vegetable preparation. Whenever coated tongues tell of constipation; whenever there's any sign of sluggishness, Castoria has a good word; children love to take it. Buy the genuine—with Chas. H. Fletcher's signature on wrapper.

THE DUSTY HIGHWAY

BY
CHRISTINE WHITING PARMENTER

Copyright 1929

CHAPTER XIII.. Continued.

She stooped, motherwise, dropping a kiss on Baby's flaxen head.

"Thank you," said Mr. Halliday, wearily. "Thank you for that, and —everything."

Then he, too, stooped above the child.

"I'm going to leave you here to play with Nick and Sonny, little girl. I'll come back soon."

She lifted a tear-stained face and would have clung to him had not Gay called her attention to the tower the boys were building.

"I'll show you how, little Marfa," said Sonny with importance. "I'll make a house 'most big enough for you to live in, too."

"Go now," Gay whispered, seeing that the child was occupied; and Halliday turned away.

He took straight to Angela's room. She stood almost where he had left her, and, closing the door, he faced her intently.

"Angela," he began, "there are guests in the house, and I cannot say what I would say otherwise. There must be no scene; but once have I warned you to curb your temper. Do you remember why?"

She shrank from him, but he followed her relentlessly, and though she tried to look away the cold gleam of his grey eyes held her own while one might have counted ten. Then through the open window was wafted the sound of childish laughter—the tension of those clashing glances broke, and the woman regained her poise.

"Aren't you a trifle melodramatic, my dear husband?" she asked, shrugging. "After all, it was only a cat."

Halliday turned.

"Next time it may be a child," he replied sternly, and left the room.

"I have used several bottles of Lydia E. Pinkham's Vegetable Compound and find it helps me wonderfully, especially before childbirth. I have five lovely children. After my last baby came I had a miserable pain in my right side so I bought another bottle of the Compound and I feel fine now. I work outside during the fruit season in addition to my housework."—Mrs. Charles Slingerland, R.R. #4, St. Catharines, Ontario.

Lydia E. Pinkham's Vegetable Compound

CHAPTER XIV.

Angela's guests stayed but a short time, though little Martha once disposed of, James Halliday tried his utmost to be agreeable, and make them forget the awkward moment of their arrival. He even suggested a small dinner to which their next door neighbors were invited, and at which Gay appeared in a charming sea-green gown that caused her hostess to stare almost rudely in surprise.

Angela thought she had taken Gay's measure when she described her as "that dowdy little thing next door." Now, seeing Halliday's interested face as he talked with their surprisingly appreciated guest, she wondered if by any chance she had been mistaken. Since the days of her own courtship she had never seen her husband treat a woman just that way. The wife pigeon-holed—and because she had any romantic feeling left for Halliday, but because she had thought him worth while—she had never been jealous. There might come a time, she thought vindictively, when the knowledge of that interest would be a godsend to her own hand. The thought brightened her eyes, making them even more blue and luminous than usual, and Halliday, who had wondered wearily, what new trouble was brewing for himself, yet later, when in the coat of the dingy little red living-room, Angela sang, her voice might have been part of some celestial choir.

"Isn't it seriously that woman sings!" said Nick, when he and Gay made their way home together across the garden. She seems to forget everything, and everybody, and give herself up to the expression of her real self. It's as if it were the music—music, words, and her lovely way of giving them life. I felt like a fool when she made me try that duet with her."

"You needn't have. Your voice isn't trained like hers, but at least it's—sincere."

"Sincere? What do you mean?"

Gay drew a quick breath.

"You—you wouldn't understand if I told you."

"Why not? Am I really so dense as that?"

"Not in everything, Nick."

"Thanks." Nick laughed, and as they reached the porch, sat down in the hammock and drew her down to his side. "Let's stay here a while and enjoy the moonlight. I don't like those aspersions on my mentality. I'll come back soon."

She lifted a tear-stained face and would have clung to him had not Gay called her attention to the tower the boys were building.

"I'll show you how, little Marfa," said Sonny with importance. "I'll make a house 'most big enough for you to live in, too."

"Go now," Gay whispered, seeing that the child was occupied; and Halliday turned away.

He took straight to Angela's room. She stood almost where he had left her, and, closing the door, he faced her intently.

"Angela," he began, "there are guests in the house, and I cannot say what I would say otherwise. There must be no scene; but once have I warned you to curb your temper. Do you remember why?"

She shrank from him, but he followed her relentlessly, and though she tried to look away the cold gleam of his grey eyes held her own while one might have counted ten. Then through the open window was wafted the sound of childish laughter—the tension of those clashing glances broke, and the woman regained her poise.

"Aren't you a trifle melodramatic, my dear husband?" she asked, shrugging. "After all, it was only a cat."

Halliday turned.

"Next time it may be a child," he replied sternly, and left the room.

"Sometimes, dear old girl, you're just plain foolish. What's a voice compared with the thing that makes you take off your shoes and stockings and go wading with a fellow? I don't say I'd want to wade every minute, or that I don't like to see your feet in those smart new pumps you're wearing, but neither could we go through life eternally bellowing duets. That's right—laugh! If anyone's been idiotic it's the lady in my arms. Won't she admit it?"

"I suppose I am; but somehow, dear, I'm satisfied you tonight and saw how—how terribly attractive you are—"

"Have you just found it out?" Nick asked, laughing and lifted her with him. "In my case don't let it worry you, because you're the only woman of my acquaintance who is sufficiently astute to discover the pleasing fact. That's a corking moon, my dear. I could sit here all night, but as the other father of the family that's liable to wake early, I presume a few hours of sleep. Let's go in."

It was next morning that Angela's guests departed. Halliday, in an endeavor to atone for his wife for whom he knew she considered his unpardonable conduct in using her room for little Martha, accompanied them to the station; checked their tickets, and was the gentlemanly thoughtful host to the last minute. When the train pulled out he walked in silence to his automobile, and assisted Angela to the place beside him.

(To Be Continued).

The First Sleeping Car

Was Very Different From Luxurious Coaches Of To-Day

Next time you travel "in a Pullman" give a thought to the man who, so far as the modern sleeping car is concerned, thought of it first. Celebratory of the birth of George Mortimer Pullman was just been celebrated in the state of New York, his State and it was while on a night trip from Buffalo in the sleeping (?) car of the middle-fifties—a coach divided into four compartments, in each of which three bunks, one above the other, were built against the wall, that he got the passenger fling themselves down, fully dressed, on rough mattresses—that he got the idea that there was no reason why such cars for travelling should not be comfortable. In 1858 he went to Bloomington, Ill., and got the co-operation of the Chicago and Alton Railroad, which furnished two old coaches, and at a cost of about $1,000 each, Pullman built into them sections on each side, a refitted one, and two washrooms. The cars were upholstered in plush, lighted by candles, heated with hot stoves, and the brakemen made up the beds. The backs of the seats were hinged, and fell downward to form the floor of the seat to form the "lower berth." The "uppers" were simply suspended from the ceiling by ropes at the corners, and hauled up at night to the ceiling, which was only a little more than six feet high.

Soon Pullman surpassed all previous dreams of luxury by building "The Pioneer," which cost $20,000. This was the first car with the hinged berth, and actually had springs. Its hitherto unheard of, and solid rubber shock absorbers. And yet how poor indeed, compared with the luxurious coaches, with sections, compartments and state rooms, in use now.

There are nearly 10,000 men employed building Pullman cars, and about 30,000 operating, maintaining and repairing them.

Canadian Hockey Sticks

422,300 Sticks Produced In Canada —Value At $297,332

The wood used in the 23 establishments specialising in sporting goods in Canada, in 1929, according to the Dominion Statistician, was shipped as sawn softwood lumber amounting to 1,872 thousand feet board measure, valued at $76,035; 756 thousand feet hardwood lumber at $67,609; 341 cords of hardwood bolts at $4,881, and veneer and plywood valued at $2,949. The more important items among the principal products were hockey sticks, numbering 632,306, and valued at $297,332, tennis racquets numbering 48,756 and valued at $213,861.

Tonic For the Car

A young man took his girl friend for an automobile ride and the car broke down. While waiting for help, the young man began to make love and said:

"My kisses will put new life into you."

Then for goodness sake," she replied, "kiss the car and let's get home."

Market For Prairie Butter

Butter supplies from the Prairie Provinces are now almost meeting the entire demand in Vancouver and Imperial, other countries having lately dwindled to very small proportions, according to the local dealers.

Caller: "Pardon me, sir, but is there another artist in this building?"

Artist: "There is not. There is, however, a man on the fourth floor who paints!"

An old Roman inscription, lately deciphered, is a will in which money was left for the support of one hundred orphan girls.

INDIGESTION
Banished by Kruschen

"I suffered for some years from a bad stomach. I used to feel very miserable after meals. The doctor advised me to take Epsom Salts, but it did me no good. I decided to try Kruschen and after finishing it, and have done for the past 12 months, and I am very glad to tell you that my stomach is now in perfect order. I feel as young in spirit as I was 30 years ago. Thanks to Kruschen."—(M. B.)

You know how badly an engine runs when it gets dirty. With us, the same with your body when your system—your digestive—fails to flow. What you need is a tonic—Nature's own tonic—Nature's abnormal salts.

You get all these six salts in Kruschen. The first effect of these salts is to produce the flow of the saliva and so awaken the appetite. Then they actively occur in the stomach, where the digestive juices begin to flow, to pour out and act upon the food. Again, they help the bowels to certain of these salts promote a further flow of bile—these salts also help you with partly digested food and prepare it ready for absorption into the system.

FREE TRIAL OFFER

To prove to you what Kruschen can do for you we will send you a sample bottle free and post paid. Write to-day, enclosing this coupon, and mentioning this paper, to Dept. 34, E. Griffiths Hughes, Ltd., Manchester, Eng. Sold by all chemists throughout the world. Price 2/9 per bottle. Importers: McGillivray Bros., Ltd., Toronto.

Claim Is Disputed

Gray's Elegy Not Written At Stokes Pogis, Says Church

The churchyard of Stokes Pogis in Buckinghamshire, England, is generally supposed to have been the scene which inspired Gray's famous "Elegy," but the claim was disputed last year in a book published by the Clarendon Press. It was written by Mr. Francis Stokes, who held that Thanington, about a mile from Canterbury Cathedral, in Kent, England, was the scene. Mr. Stokes based his claim on the poet's visits to Thanington, and the only locality, on behalf of which direct evidence can be produced, is a mangerre flung down by Nicholas Stoner, then rector of Thannington, and mayor of Canterbury, writes in the "Guardian," that Mr. Stokes made no such claim. He says that Gray took much interest in Bentley's illustrations of the poems in 1753, and asks: Is it not likely that one of the scenes of the ancient abbey are shown, such as St. Augustine's Abbey, Canterbury, which Gray was drawing at all like the Stoke church? No curfew was ever heard across Stokes Pogis churchyard, for the curfew has not rung nightly for many centuries from Bell Harry Tower, Canterbury Cathedral, over the meadows to Thanington, a mile away.

Look Over This List

All Business Depressions But They Came To An End

There was a business depression in 1815 lasting 12 months.

There was a business depression in 1819 lasting 8 months.

There was a business depression in 1873 lasting 20 months.

There was a business depression in 1884 lasting 22 months.

There was a business depression in 1887 lasting 10 months.

There was a business depression in 1903 lasting 25 months.

There was a business depression in 1907 lasting nearly 12 months.

There was a business depression in 1914 lasting 8 months.

There was a slight business depression in 1921-22 lasting 14 months.

All of them came to an end except the one. It will too.—Chicago Daily News.

Canadian-Made Snuffs

The habit of taking snuff is not declining in Canada; in fact it is on the increase. In 1929 over 997,000 pounds were manufactured, $1,300,953, an increase of over 337,000 pounds in weight, and more than $530,000 in value compared with 1919. Canadian-made snuff is used for domestic consumption as it is not mentioned in the exports.

A man seldom meets another man who is smarter than himself.

The piano was invented early in the eighteenth century.

CORNS *LIFT OFF* **Pain Stops!**

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any druggist for 25c.

PUTNAM'S

Our Good Old Railroads

Have Been the Greatest Factor In Community Building

I'm certainly friendly towards the railroads. If I want to go somewhere they'll take me safely, swiftly and in a style not inferior to that enjoyed by royalty. They'll insure my life and well-being, and charge less than it would cost me to drive an automobile. They'll take me day and night, through all kinds of weather, and the strictest matters not at all. They'll furnish me with bed and meals en route, and every courtesy and privilege will be accorded me.

I'm friendly toward the railroads because they are the most cordial and sympathetic co-operators in the community-building enterprises. They help us maintain our schools, they help us maintain our streets, they pay largely toward laying water and sewer mains, they keep their own property in the best possible physical condition, and they stand ready to meet every emergency that arises in the way of public welfare.

I like them because they are not a bunch of fly-handed never-sweats. They toot at their jobs. They'll transport anything from there to here and vice versa. They don't make a fuss if the freight is dirty, and smelly. They don't holler if it is heavy and hard to handle. They don't complain if it is shipped either local or carload. They'll give me the same consideration for a hundredweight box or for a hundred tons. They are a democratic outfit of folk, those railroaders—they play no favorites.

Recipes For This Week

(By Betty Barclay)

MACEDOINE SALAD

2 cups cooked rice.
1 cup peas.
4 tablespoons' pimento.
4 tablespoons radish.
3 tablespoons celery, minced.
3 tablespoons cheese, grated.
1 teaspoon salt.
Mayonnaise and dressing.

Combine ingredients lightly, chill Serve on crisp lettuce with French dressing or mayonnaise.

POT OF GOLD DESSERT
(Serves 4)

½ cup sugar.
¼ cup cornstarch.
⅛ teaspoon salt.
1 cup milk (evaporated milk may be used).
1 cup orange juice.
2 tablespoons butter.

Mix dry ingredients, add milk and orange juice and cook in double boiler until thickened. Add butter. Pour into individual molds. Cool. Serve with milk or cream.

Advertising Is More Necessary Than Ever

No Year To Curtail, Says New York Business Man

"Advertising educates the advertiser himself," stated J. S. McCullough, president of the New York Telephone Company, at the luncheon given in his honor at the Advertising Club of New York. "It causes him to study his own business more thoroughly in order to tell the public the truth about it," he continued.

"1931 is no year to curtail advertising if you are going to do any business at all. Last year alone the New York Telephone Company will not curtail their advertising appropriations this year," stated the speaker. Last year the telephone companies used 452 newspapers in this State alone.

Powerful Medicine.—The healing properties in an essential oil are concentrated in every bottle of Dr. Thomas' Eclectric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is best expressed by the small price at which it sells.

As Scotland Does It

The manager of an Aberdeen firm called his bookkeeper into his private room.

"Sandy," he said, "the accountant is leaving and I'm goun tae gie you his job."

The young bookkeeper's face lit up with expectation.

"Thank you, sir," he replied. "And what will the salary be now?"

The manager shook his head.

"The same as you're gettin', but ye'll hae a bat-peg to yourself now," he returned.

Twenty-One Portlands

A statistically-minded soul scanned a postal guide and learned that there are twenty-one Portlands in the United States with a combined population of a little more than 400,000, more than 300,000 of whom live in Portland, Oregon.

The reason the minister's daughter has so many boy friends is because her father gives out the hints.

La Grippe and "Flu" are Spreading

"Flu" First Appears as a Sore Throat, but Gains Tremendous Headway in Six Hours

AN EFFECTIVE TREATMENT DESCRIBED

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop penetrates deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Experienced mothers know how valuable Nerviline is for Coughs, Colds, Sore Throat, and the little ailments that arise from time to time in most homes is called "Mother's Best Friend." 35c at all dealers.

Cruise Around the World

Itinerary Of Cunard Liner "Franconia" Is Announced

The tentative itinerary for the Cunard liner "Franconia" cruise around the World in 1932, has just been made public in a statement by Arthur Randon, general passenger traffic manager of the Cunard Line in Canada, reveals a list of ports of call of striking diversity and attractiveness from the world cruise standpoint.

The fact that the "Franconia" is large enough for comfort in cruising yet not too large to enter most of the smaller harbours of the world opens a field that many port of her passengers which they would not be able to see were she larger. At the principal ports the "Franconia" is able to tie up to the docks, obviating the necessity of long and tedious rides in tenders from ship to shore.

Perhaps the most important new feature of the next year's cruise of the "Franconia" around the World will be an added port of call at Bali, with more than three days allowed for her passengers to see the many historic and sacred places in Polynesia. The call at Bali will probably be an included feature of the "Franconia's" cruises, with stops at both Bukittinggi and Tjokk Padang planned for the 1932 cruise.

Other outstanding features of the "Franconia" cruise will be a halt at Athens, Cap S. Jacques (for visits to Saigon and French Indo-China), Pakhan (for Shanghai), Macassar in the Celebes, and Chiswangtao (for Peiking).

Worth Of a Good Rain

Is Many Million Dollars If It Comes In Right Season

What is a good rain worth?

Computing on the basis of average prices for the past 10 years of North Dakota crops, J. H. Kienast, statisman of the U.S. Department of Agriculture, says one good rain any time from May to August has not been a "million dollar" rain, but a 17 million dollar rain.

Using the rainfall records from May to July, he stated that one inch of rainfall in North Dakota produces about six millions' bushels of oats, nearly three million bushels of barley, nearly one million bushels of potatoes, more than a half million bushels of flaxseed, about nine million bushels of wheat and more than one thousand tons of hay, to say nothing of truck garden and other crops.

Relieves Asthma At Once. If you could read the thousands of unsolicited letters received by the manufacturers of Dr. J. D. Kellogg's Asthma Remedy, from grateful users you, too, would realize the remarkable power of this handsome as Apollo, but not conceited; wise as Solomon, but meek as a lamb; a man who is kind to every woman, but loves only one.

He—"By Jove! How lucky we met!"

She—"The man I marry must be brave as a lion, but not forward; handsome as Apollo, but not conceited; wise as Solomon, but meek as a lamb; a man who is kind to every woman, but loves only one."

He—"By Jove! How lucky we met!"

Little Helps For This Week

"Tribulation worketh patience, and patience experience, and experience hope."—Romans v. 3, 4.

Is the road very dreary?
Patience dear!
Rest will be sweeter if thou art aweary.
And after night cometh the morning cheery.
Just bide a wee and dinna fret!
The clouds have silver lining,
The night is long
And though He's hidden, still the sun is shining.
Courage instead of tears and vain repining.
Just bide a wee and dinna fret!

"Be patient," said a Scotchman, reprovingly, to his little son.

"What is to be patient, father?" inquired the child.

"Bide a wee and dinna weary," replied the father, with a loving pressure on his shoulder.

How often God's restless children do not wait, and how often they do weary in waiting! Yet He is greatly honored by the trustful spirit, that patiently resigns the unfolding of His inscrutable purposes into His hands; for we know that a meek and quiet spirit is in the sight of God, of great price.—Anna Shipton.

Perfection Is Scarce

Artists Frequently Use Many Models To Produce Results

Many admirers of magazine covers often wonder how the artists secure such wonderful and perfect models so poor for their work and little do the public know the work required to turn out a beautiful subject. In fact artist Treadwell's famous cover designs it required six different girls to pose for the one girl displayed on the cover. He used one girl for the perfect face, another for the perfect limbs—one for the perfect hair—one for the perfect eyes—one for the nose—and another for all around beauty—so too many cooks in this case do not spoil the broth.

Douglas' Egyptian Liniment makes the finest blister known. Is valuable in deadening pain and acts to a natural and healthy condition. Hair comes back. No scar remains.

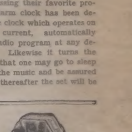
The Levelling Process

There are 150,000 fewer farms in the United States now than there were in 1920. There are more of us each year who want to eat and fewer of us who provide the edibles. If this thing keeps on, such few farmers as retain their independent calling will be the envy of the people in the same way in which a few years ago "farmer" was a term of derision in the mouth of the city-dweller just another levelling process.

Invention For Radio Fans

To prevent radio listeners from accidentally missing their favorite programs, an alarm clock has been developed. The clock which operates on alternating current, automatically tunes in a radio program at any desired time. Likewise it turns the radio off, so that one may go to sleep listening to the music and be assured that shortly thereafter the set will be silent.

SOUR STOMACH



Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids.

Remember—the genuine is always a liquid. It cannot be made in tablet form. Look for the name Phillips'. It is always on the wrapper for your protection. Drugstores everywhere have the 50c bottles.

THURSDAY, APRIL 2, 1931.

ARRANGE WELCOME TO GOVERNOR-GENERAL

Canada's 14th Governor-General, accompanied by the Countess of Bessborough and his suite, will land in Nova Scotia on April 11, on the Duchess of Bedford. He will leave there that night, arriving in Ottawa on April 6.

Official and civic welcomes will be tendered Lord Bessborough both in Halifax and Ottawa, but the ceremony of enthronement will be conducted in Halifax. The Duchess of Bedford is expected to arrive in Halifax harbor about 10 a.m. Immediately afterwards Mr. Justice Lyman P. Duff, who is administrator of Canada in the absence of a Governor-General; Prime Minister R. B. Bennett, and Hon. C. H. Cahan, secretary of state, will board the ship and pay their respects to the Earl and Countess of Bessborough.

The King's representatives in Canada will leave the ship about 11 o'clock, and will receive an official welcome on the pier from Dominion and provincial officers. Members of the Supreme Court of Canada and representatives of the military and naval forces will be present. There will be the usual guards of honor, and a salvo of 19 guns will boom out the vice-regal salute.

The swearing-in ceremonies will be conducted in the Nova Scotia legislature at noon, to be followed by a luncheon given by the Dominion government. Lieutenant-Governor Stanfield, of Nova Scotia, will be the host at dinner in the evening and the Governor-General and Countess Bessborough will entrain for Ottawa at 10 p.m.

Prime Minister Bennett, and Premier Harrington of Nova Scotia will lead in the official welcome immediately after the Governor-General leaves the ship. The mayor of Halifax is expected also to take a part.

On his arrival in Ottawa the Governor-General will be given another official welcome by Premier Bennett, and members of his cabinet and diplomatic officers. A civic welcome will be given in the Senate Chamber before the Earl and Countess of Bessborough reach the end of their journey at Rideau Hall.

NIL CONSCIRE SIBI

We take the opportunity at this time of drawing the attention of the members of M. D. Council of Lambton—who seem to be conscious of no fault—and the ratepayers of the district as well, to certain matter, insofar as The Delia Times is concerned. Up till the present we have been publishing the minutes of the meetings of the council each month free of charge, and receiving little or nothing in return, particularly in the line of job printing. As will be noticed in the minutes published in another column, most of the council's printing is being sent out of the district, to the West. Municipal News, and amounted last month to nearly 100 dollars, whereas for the previous eight months The Times has only been enabled to receive business of any kind from Lambton to the value of 6 dollars. Surely there is some of the council's printing we could handle, and execute just as satisfactorily. We cannot understand why it suits the council to pass us the free work, and send all the paying stuff out of the district, especially these hard times. In justice to ourselves, we ask if this is a square deal? Should the M.D. Council of Lambton be unable to look at this matter from our point of view, and persist in their present attitude, we will have to charge in future for printing the minutes of their meetings, at our regular rates per line. Now we are just wondering if the firm they have been patronizing so extensively would be willing to print the minutes of their meetings each month free of charge, and mail them to all the tax payers in the district besides. We are in much the same position as Major Bowes and the dog-catcher, whom he wanted to work for nothing. All he got was cores and bunions, travelling up alleyways and over vacant lots, whistling!

Local and District

BIRTH

CARSWELL.— Born, to Mr. and Mrs. F. E. Carswell, of Delia, at their home on March 8th, 1931, a son.

* * *

Miss Dorothy Walker was a visitor to Calgary last week.

* * *

Sid Crashaw, of the Farmers' Store, has been confined to his home thru illness since last week.

* * *

Friday next, April 3rd, is Good Friday, and a statutory holiday. All business places in Delia will be closed.

* * *

There will be a meeting of the local branch Canadian Legion held in Coates' Hall on Saturday evg., 4th April, at 8 p.m. sharp. All members are requested to attend.

* * *

Frank Grassmann, teller with the Bank of Commerce here, who has been on the sick list for some time, left in company with Wm. Gibson by auto for Calgary to receive medical treatment last week, and returned Friday.

* * *

Messrs. John Carter and Riza Long delivered a truck load of hogs to the Co-operative Livestock Association in Calgary on Thursday evg last. They were well satisfied with prices received. The trip was made in four hours, and report the roads being in splendid condition.

* * *

The public meeting held in the Rest Room on Monday evg., in connection with the formation of a livestock pool in the district, took up up Hanna and Craigmyle, was fairly well attended by farmers and others Mr. R. A. MacPherson acted as chairman, and introduced the speaker of the evening, Mr. Fred McDonald, who gave a very stirring address on the advantages of the Livestock Pool. The address was well received, and a committee was appointed to carry on the work.

Ladies desiring permanent waves should take advantage of the Easter special by Mrs. Ferry, manicurist, of Hanna. See advt. on first page.

* * *

The weather has again turned mild. On Tuesday evening a dust storm came up from the west, but lasted only for a short while owing to a nice shower. Northerly winds, frosty nights, and cloudy skies, threatening further precipitation, is the order of the weather at present writing.

* * *

"Christ is risen." We are all reminded of this fact on Easter Sunday. Remember the services of worship. Christianity is due to the belief in the Resurrection. Special Easter music. At the close of the service in the United Church, the Sacrament of the Lord's Supper will be administered.

* * *

Word was received by Rev. Geo. A. Steele that his aunt, Mrs A. M. Cunningham, had passed away on Thursday last in Hillview Hospital, San Jose, California. Mrs. Cunningham, who was eighty years of age March 15th, died from the effects of a fall, when she fractured her hip. Her husband pre-deceased her several years ago in San Jose.

* * *

Are you interested to know who built the pyramids and what its teaching is? If you are, come to the Baptist Church next Sunday at 12 noon. Would you like to know something about the new heaven and earth? If so, come to the Baptist service at 7.30 p.m. Come early, and enjoy the song service.

* * *

Owing to the cold snap the latter part of last week, and the ice being in fair shape, some exciting games were played, not alone by the men, but by lady curlers as well. In a game skipped by Messrs. Jim Sinclair and John Jackson, enthusiastic lovers of the "stane and broom," the latter whipped the former by the large score of 17—2 on Saturday night.

* * *

Mr. and Mrs. Jim Wilson received word last week of the death of Mr. Hans Jensen, an old-timer of the Delia district, who passed away at an old home in Wisconsin. Mrs. Jensen leaves to mourn his loss five sons and three daughters. His son-in-law, well-known to Delia baseball fans, is now happily married, and is employed in an automobile factory in New Jersey.

* * *

On Friday evening, March 27th, Sentinel Hill W.I. sponsored a social evening at Sentinel Hill School, though the weather was bad, 50 sturdy attended. Cards were played from nine till eleven o'clock. Mr. John Vail captured the men's first prize, and Miss Carter the ladies' first prize, while consolation prizes were awarded to Mr. W. C. Lee and Mr. Gerald Lee. Lunch was served at midnight, after which dancing was enjoyed until three a.m. Music was supplied by Mr. F. Needham and Mrs. V. J. McNair.

* * *

A surprise party was held recently at the home of Mr. and Mrs A. L. Gordon, north of town, in honor of their daughter, Miss Florence Gordon, who has been visiting Hanna, Craigmyle, and Delia—viz. Misses Dorothy Walker and Ada Lees, Messrs. Frank Grassmann and Roy Anderson. Craigmyle—Miss Grace Dunham, Miss R. Cumberland, Mr. and Mrs. Peterson; Messrs. Jim and Gordon Eaton, and R. Geissinger. Hanna—Mr. and Mrs. W. N. Graburn, Miss Florence Perry, Miss Jackey Treut, Dr. S. Somers, Bill Cole.

RED CROSS

A Red Cross tea and meeting will be held Saturday, April 4th, commencing at 3 p.m., in the Rest Room. Members are requested to meet in the Rest Room at 2 p.m. for a short business meeting, for the information of members wishing to donate towards the lunch. The menu is planned as follows:—Chicken salad bread and butter; or jelly with fruit and whipped cream, bread, and butter, cake, tea or coffee.

It was decided to set aside several tables for those desiring to play bridge.

"I can't stand him—he's an awful flat!" "Yes, but he's got a motor-car and two thousand a year—what more do you want—still a flat with every modern improvement."

"Dearie, it is most you a good deal to run a husband, still mine is." "Yes, but my wife can't spend a farthing when I've at one."

Health Service of the Canadian Medical Association

CORRECT EATING

A great deal of thought and considerable amount of attention are given, in many homes to the selection and preparation of the meals. This is as it should be, and it is desirable also that the food, as it comes to the table, be eaten in such a manner that the body will be able to make the best possible use of it.

Meals should be eaten quietly, and there should not be any hurry and rush in the dining-room. Food is not readily digested when the body is tired. If the individual is tired, a rest before eating will aid digestion, as will also a meal that is eaten quietly and calmly.

Arguments or scoldings should never be carried on at meal-time. Emotional upsets, anger or worry interfers with digestion. Meal-time should be a cheerful and happy time.

The body is better able to digest food when meals are taken regularly. The regular meal-time gives the digestive system the periods of rest which it requires. If the meals are taken at all hours, or if there is eating between meals, there is no time left for the organs of digestion to rest.

Food should be thoroughly chewed before it is swallowed. Do not be afraid to use your teeth. Using the teeth is one of the best ways of keeping teeth and gums in a healthy state.

There is no objection to the moderate use of beverages with meals, but they should only be taken when there is no food in the mouth—never used to wash down food before it is thoroughly chewed.

When sitting down to a table, it is not wise to drink cold water before the meal begins. At that time, the blood vessels of the stomach are dilated and the gastric juices are active. Under such conditions, a dash of cold water is undesirable as it causes the blood vessels to contract, and checks the secretion of the gastric juice.

Cold water or milk should be drunk slowly and taken during the meal, not before solid food is taken.

Moderation should be practised at all times. It is harmful to overeat. Excess does harm; it throws an undue strain on the body and so wears the tissues out early. Premature old age generally means that moderation has not been practised.

Eat moderately, eat slowly, and make meal-time a happy, restful time—that is the way to eat.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

* * *

"I think this scenery is just heavenly." "I don't know. Take away the mountains and the lake and it's just like anywhere else."

From a provincial newspaper: "Owing to the unusual conditions of our columns a number of births and deaths are unavoidably postponed till next week."

Canada Must Win World Championships

World Championships in 1932 will be won by farmers who recognize that the cleanest and best quality seed with the most careful cultivation are essential to the production of the highest yields. It is recognized that those things should apply to the wheat crop area, concentration upon a small plot in the best soil and careful sowing are absolutely necessary. If such a plot is subjected to extra preparation—with more care probably than it is possible to devote to the whole crop area—and sown to the very cleanest seed it will not only provide good quality foundation stock for next spring's seeding, but a winning sample for exhibition as well.

The World's Grain Exhibition and Conference
REGINA, JULY 25 to AUG. 6, 1932

This great World Exhibition and Conference is organized by the people of Canada's farmers, for the advancement of Canada, agriculture, to demonstrate the superiority of Canada's best grain, and to secure a world-wide market for Canadian grain products—Canada's seeding will compete for the world's grain crop in 1932.

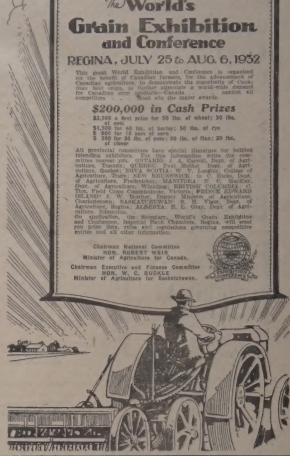
$200,000 in Cash Prizes

$3,500 a New prize for 20 lbs. of wheat; 10 lbs. of oats
$1,500 " " 10 lbs. of barley; 10 lbs. of rye
$ 300 for 20 lbs. of flax
$ 350 for 20 lbs. of peas; 20 lbs. of flax; 20 lbs. of corn

All provincial committees have special literature for bulletin boards, distribution, etc. Provincial committees are as follows: Chairman, Executive and Finance Committee, Dept. of Agriculture, Toronto, ONTARIO; Chairman, Executive and Finance Committee, Dept. of Agriculture, Quebec, QUEBEC; Hon. Minister, Dept. of Agriculture, Fredericton, NEW BRUNSWICK; Hon. Minister, Dept. of Agriculture, Halifax, NOVA SCOTIA; Hon. Minister, Dept. of Agriculture, Winnipeg, MANITOBA; W. C. Nichol, Dept. of Agriculture, Edmonton, ALBERTA; Chairman, Executive and Finance Committee, Provincial Exhibition Committee, Regina, SASKATCHEWAN; Chairman, Executive and Finance Committee, Provincial Fair Committee, Regina, will send entries and all other information governing competition entries and all other information.

Chairman National Committee
Hon. W. R. Motherwell, Regina, Sask.
Minister of Agriculture for Canada.

Chairman Executive and Finance Committee
John W. Ruddle, Regina, Sask.
Minister of Agriculture for Saskatchewan.



Meighen Youngest Canadian Premier

Canada has had eleven premiers. Two of them have been bachelors; two of them have held office twice. The shortest term was that of Sir Charles Tupper in 1896. The longest continuous term was Sir Wilfred Laurier's, from 1896 to 1911, but Sir John A. Macdonald still holds the record of having been Premier longer than anyone else, not counting his premiership before Confederation.

The average age of our Premiers when they took office is between 60 and 61 years. Sir Charles Tupper was the oldest man to become Premier, and the Rt. Hon. Arthur Meighen the youngest. Eight of our Prime Ministers have been members of the Imperial Privy Council, although Sir Charles Tupper was not until long after he had ceased to be Prime Minister. Six of our Prime Ministers have been knighted; one was a baronet.

Six Premiers have been members of the bar. One Prime Minister, Sir John Thompson, had been a judge. All our Prime Ministers have been members of the House of Commons; Sir John Abbott, who had been a member for many years, was a Senator during his Premiership, and Sir Mackenzie Bowell became a Senator after he was Prime Minister.

Only two Prime Ministers have died in office—Sir John Macdonald and Sir John Thompson.

Two men became Prime Ministers without having previously been members of the Government—namely, the Honourable Alexander Mackenzie, and Sir Robert Borden.

All Prime Ministers of Canada, save the first two (who were of Scottish birth) and Sir Mackenzie Bowell (who was of English birth), were born in Canada. Nova Scotia leads with three, New Brunswick one, Ontario two, Quebec two. Two of the eleven Prime Ministers have been Roman Catholics.—Ottawa Review.

Governor General's Arrival

Precedent demanding that Lord Bessborough shall become "His Excellency the Governor-General and Commander in Chief" at Halifax where he will be sworn at the historic Province Building, Captain H. Williams, R.N.R., commander of the Canadian Pacific liner Duchess of Bedford will divert his vessel from her regular course and call at the Nova Scotian capital to land the vice-regal party next Saturday. The lay-out shows Lord Bessborough, the former Governor-General of Canada, the Duchess of Bedford, 20,000 ton liner—largest Canadian vessel to sail at Halifax.
